

## 'K' Series Marking Tags

The quick to fix 'K' series Polyamide Marking Tags facilitate identification of Electrical circuits in a Terminal Block assembly. This in turn makes the maintenance of individual components quicker and hassle-free. The tags come with a large surface area providing better visibility.

The Marking Tags are available in both printed and blank versions. The printing can be horizontal or vertical in 2 or 3 digits, alphabets or symbols or a combination of these depending on user's requirement.

For ordering pre-printed marking tags, the following pattern should be followed:

For a strip of marking tags for CTS2.5UN Terminal Blocks marked horizontally from 1 to 10: CA509/K5H-1-10

For a strip of marking tags for CTS4UN Terminal Blocks marked vertically with alphabet A: CA509/K6V-A

### Blank Marking Tags

### Tags with Horizontal Print

### Tags with Vertical Print

## Insert Type & Group Marking Tags

For Melamine Terminal Blocks, PVC Insert type markers are also available which should be mounted on the rib provided in the Terminal Blocks. The Group Markers are made out of Polyamide 6.6 and have a very large blank surface area which can be used for group identification. These can be fixed directly on the Terminal Blocks or on End Clamps.
