

(Affix to outside of packaging)

PLEASE READ THIS NOTICE

VERY IMPORTANT

The Rota-Spray is constructed in PVC Plastic with welded seams and joints. This practice has been widely used throughout the Chemical Processing Industry for many years. It is physically very strong and extremely resistant to many corrosive chemicals.

The only disadvantage with this technique is that it makes the construction hard and brittle.

Therefore extreme care should be taken when placing the unit on any surface.

When removing from packaging, ensure the unit is lifted evenly and gently and placed very gently on to a flat surface.

Please avoid any heavy landings on corners, as this will induce a shear action which can cause cracking in the carcass.
