## Thermal Protector TB 02

## Applications

Thermal overload protection of small electrical equipment, small electric motors, heating appliances, fluorescent lighting ballasts and others.

## Function

The thermal protector TB 02 normally operates not current sensitive. Temperature detection is realized by a bimetal snap disk.
Using high-impedance bimetal material, the response time of the protector can be reduced (moderate current sensitivity).
The thermal protector is available with normally closed (NC) as well as normally opened (NO) contacts.

After cooling down to the snap-back temperature of the bimetal disk, the protector returns to its initial position automatically.

## $\rightarrow$ compact design

$\rightarrow$ mould-proof housing
$\rightarrow$ high thermal sensitivity
$\rightarrow$ high mechanical stability (especially metal housing)

## Technical Data Thermal Protector TB 02

| Switching Capicity | $250 \mathrm{~V} / 50 \mathrm{~Hz}, 2 \mathrm{~A}$ |
| :--- | :--- |
| Minimum Current | 50 mA |
| Max. Switching Capicity | $250 \mathrm{VAC}, 2 \mathrm{~A}$ |
| $\mathbf{1 0 . 0 0 0}$ Cycles | $115 \mathrm{VAC}, 3 \mathrm{~A}$ |

## Technical Informations

The thermal protector TB 02 is enclosed by a mould-proof housing which is available as metal or plastic type.

## Tripping Temperature vs. Current

Dimensions TB 02

## TB 02 plastic housing

Standard leads are 70 mm (22/24 AWG).

Other leads (diameter, stripped etc.) are available on request.

## Coding system

Current vs. Tripping Time
