

## ESD Wash Bottle

Our bottles have been produced using a new process utilising a concentrate that does not contain any Exthoxylated Tertiary Amine, which is widely used as an antistatic agent. These

ESD safe bottles have an average surface resistivity of  $10^9$  to  $10^{10}$  Ohms / square and do not have any less desirable features associated with surfactant laden material.

These bottles will dissipate a static charge of  $\pm 5000V$  in less than two seconds at 40% relative humidity. By their chemical nature, they will not have any chemical reactivity with solvents such as TCE or alcohol. The pH of the deionised water solutions tested were the same before and after a seven day period. No colour change or any other physical change was noted for any solvents tested.

### Features

- 8 or 16oz Bottles
- Non greasy
- Cleanroom safe
- Static Free
- No Tertiary Amines
- Humidity Independent
- Average Surface Resistivity of  $10^9$  to  $10^{10}$  Ohms / Square
- Helps to Meet ESD-T20.20-2000

Product Code	Description	Size	Additional notes
146-0038	ESD Wash Bottle	8oz Bottle	Each
146-0040	ESD Wash Bottle	16oz Bottle	Each
