Electronic Folding Probe Thermometer

This **foldable probe thermometer** from **Brannan** can be used to measure and display temperatures in a range of scenarios from agriculture and energy management to food processing and laboratory work. The **stainless steel sensor** probe is adjustable from 0 to 180°, enabling the display to be viewed from a variety of angles.

The display is automatically turned on when the probe is opened more than 30° and switches off when the probe is closed to less than a 30° angle.

- Probe folds away for easy storage when thermometer not in use
- Temperature measuring range -50 to +250°C/F (switchable)
- One second temperature sensing time
- IP65 protection
- LCD dimensions 32 x 15mm
- Probe length 85mm
- Supplied with wrist strap
- Requires 1 x LR44 battery (supplied)
- Manufacturer's part **31/175/0**
