4000 Platinum Kit (4000-6/128) - 6 Attachments and 128 Accessories

The Dremel 4000 Platinum Edition is the ultimate Dremel 4000 multitool kit. As well as the top-of-the-line Dremel 4000 with EZ-Twist Nose Cap the kit includes 6 useful attachments and 128 genuine Dremel accessories, all packed in a high-quality aluminium tool case.

- **Kit contains:**
- Dremel 4000 multitool
- 128 high-quality Dremel accessories
- Detailer's Grip attachment (Dremel type 577)
- Line and Circle Cutter attachment (Dremel type 678)
- Right Angle attachment (Dremel type 575)
- Cutting Guide attachment (Dremel type 565)
- Shaping Platform attachment (Dremel type 576)
- Flexshaft attachment (Dremel type 225)
- Instruction manual
- aluminium carry case

548000

4000 Multitool with 45 Accessories

This kit includes the high performance 4000 multitool, with innovative features like electronic feedback, collet lock out function and a RPM bandwidth of 5,000 to 35,000rpm.

Additionally the kit includes the Flexshaft attachment, which is the ideal attachment for detailed work on hard to reach places. Next to the Flex Shaft attachment the kit includes 45 original Dremel accessories including SpeedClic.

- **Features and Benefits:** High power 175W motor for high performance
- Soft grip in all gripping areas for better handling
- Full variable speed control (5,000 to 35,000rpm) for maximum precision
- Electronic feedback for enhanced torque and performance
- Separate on/off switch with integrated collet lock function
- **Contents:**
- Dremel 4000 multitool fitted with a 3.2mm collet compatible with most Dremel accessories
- 45 high quality Dremel accessories (including SpeedClic starter set)
- High quality Flex Shaft
- Inspiring information DVD and Instruction manual
- Soft bag

3000-1/25 Multi-Tool Kit + EZ Wrap Holder, Flexi-Shaft & 25 Accessories

The Dremel 3000-1/25 kit includes the Dremel 3000 Multi-Tool, the 225 high quality flexible shaft and 25 genuine Dremel accessories including EZ SpeedClic.

This great value kit's contents are packed in a neatly organised case that includes a removable accessory tray and an innovative tool holder that allows easy winding up of the tool's cable - often an untidy nuisance in the tool box.

Kit includes:

- Dremel 3000 multitool
- 25 high quality Dremel accessories (including EZ SpeedClic accessories)
- Flexishaft attachment (225)
- Instruction manual
- Spacious and sturdy storage case with a removable accessory tray
- Unique tool holder for easy storage of your power tool and its cable

PROXXON

Micromot 60/EF, 12V Rotary Tool

A 12V rotary tool for model builders, electronic hobbyists, opticians, jewellery workshops, arts and crafts and much more!

- Ideal for milling, drilling, routing, polishing, cutting, cleaning, brushing, de-burring, sawing and engraving steel, precious metals, glass, ceramics, plastic and minerals
- Thyristor electronic speed control
- High torque, even at low speeds
- Keyless chuck takes 0.3 - 3.2mm bits
- 20mm standard collar fits Micromot accessories
- Fibreglass reinforced polyamide housing
- Pleasant soft component finger grip
- Requires a Micromot transformer of at least 1.0 A rating
- Proxxon model 50/EF
- **Note:** The speed control of Proxxon 12 volt devices only works when operated via non-stabilised power supply units (e.g. all Micromot mains adapters). Connection to stabilised power supply units is possible, however, the devices will then operate with maximum rotational speeds (also applies to operation with batteries).

PROXXON

28600 Micromot MB 200 Drill Stand

The Proxxon Micromot MB 200 drill stand can be tilted through 90° to enable bevelled drilling and versatile milling operations. A geared rack-and-pinion feed with return spring allows effortless and sensitive operation.

It has a practical drill depth scale with an adjustable limit stop (maximum travel 40mm) and a standard 20mm collar to suit Micromot drilling and milling devices.

- Head with dovetail guides
- 280 x 20mm solid, hard chromium-plated steel column
- Throat capacity: 140mm
- 220 x 120mm plane-milled table with parallel limit stop and scale
- Drilled, tapped holes for securing the KT 70 compound table (not included)
- Holes to fix the drill stand to a bench
- Made from die-cast aluminium parts
- CNC-machined guides and fittings
- Weight 2.2kg
- Proxxon type: MB 200 / 28 600

Pillar Drills

**PBD 40, 710W
Bench Pillar
Drill**

The Bosch PBD 40 is a powerful and precise bench mounting pillar drill with a digital display of drilling speed and drilling depth. The drill provides excellent visibility with a laser crosswire that allows the workpiece to be precisely positioned before drilling and an LED worklight that keeps the work area well illuminated and free from shadows.

- Electronic digital display shows exact speed
- Bosch Constant Electronics ensure consistent speed
- Digital display of exact drilling depth for consistent drilling of rows of holes
- 2-speed gearbox: high power in 1st gear, high speed in 2nd gear
- High-quality, keyless precision chuck automatically tightens the drill bit
- Retaining ring guarantees a perfect hold on the drill bit
- Integrated laser crosswire for precise drilling at exactly the required position
- LED light ensures that the work area is well lit
- Softgrip wheel for controlled, comfortable drilling rate
- Supplied complete with parallel clamp and quick-release clamp
- Quick-action clamp holds even round workpieces
- Parallel guide and large work plate ensure accurate and safe positioning of the workpiece

STEAM to life

DCD795 & DCD796 Compact Brushless Hammer Drill Drivers - 18V Li-Ion

These **18V compact brushless hammer drill drivers from DeWalt** are a superb addition to any tradesman's toolbox, as they use brushless motor technology for excellent efficiency. The brushless motor delivers up to 57% more run time over brushed, while its ultra compact, lightweight design allows use in confined spaces. The two speed all metal transmission increases runtime and provides a longer tool life.

Features include the high speed transmission delivering 2-speed settings (0-600/0-2,000 RPM) improving speed and torque control across a range fastening and drilling applications, while offering 0-34,000bpm for fast drilling in masonry materials. There is also an ergonomic comfort grip handle provides ideal balance and tool control, plus an LED light with 20 second trigger release delay for increased visibility in dark or confined spaces. The LED placement on tool foot eliminates chuck shadows. XR™ Li-Ion batteries with fuel gauge provide 33% more capacity over standard packs.

- Compact and lightweight design fits into tight areas
- Voltage: 18V
- No load speed: 0-600/0-2,000/min
- Impact rate: 0-10,200/0-34,000/min
- Max torque: 60Nm
- Capacity: wood: 38mm, steel: 13mm, masonry: 13mm

Bosch 06039A8071 IXO V Full Set With Angle Screw Adapter

This **cordless screwdriver from Bosch**

is an ideal companion for the professional tradesman looking for precise driving. The screwdriver has been manufactured to a high standard and is equipped with a host of excellent features, including an ergonomic design, which enables multiple grip positions for comfortable working.

Other features and benefits include:

- New power LED light concept - either as spotlight or scattered light
- With micro USB charger for fast charging
- Angle screw adapter - optimum flexibility when driving screws in hard-to-reach areas
- No memory effect, no self-discharge: always ready for use thanks to lithium-ion technology
- Automatic spindle lock for manual tightening or loosening of screws
- Intuitive control concept
- Charge level indicator via LED

Supplied with an additional off-set angle adaptor.

- Battery voltage: 3.6V
- Screw diameter up to 5mm
- No-load speed: 215 rpm
- Machine weight: 0.3kg

PSB 1800 LI-2 Cordless Combi Drill

The Bosch PSB 1800 LI-2 Cordless Combi Drill is ideal for screwdriving, drilling and impact drilling in wood, metal and masonry. It has 20 pre-selectable torque settings plus a drill and impact drill setting providing optimum power for every application.

Thanks to its lithium-ion technology the drill's battery is immune to memory effect, self-discharge and is always ready to use.

The Bosch PSB 1800LI-2 is available with either 1 or 2 battery packs.

- Powerful lithium-ion battery and 60-minute charger, for use with all DIY and garden tools in the Bosch 18 volt system
- No memory effect, no self-discharge
- Always ready for use
- Long battery pack life due to Bosch Electronic Cell Protection (ECP)
- Charging station charges the battery on its own or together with the tool
- Intelligent 3-stage charge level indicator
- 2-speed planetary gearbox
- Forward/reverse rotation with indicator
- Torque preselection with 30 settings plus a drill and impact drill setting
- Optimum power for every application
- Bosch Electronic speed control allows you to accelerate from 0 to max. using the trigger switch
- Keyless chuck with Bosch Auto-Lock for the fastest and easiest tool changes
- LED PowerLight keeps your workpiece well lit and clearly visible

The Milwaukee M18 FPP6D2-503B FUEL™ Powerpack 6 Piece Kit, contains the following:

1 x 18V M18 FPD2 FUEL™ Combi Drill has a Milwaukee® designed and built brushless POWERSTATE™ motor for heavy application under load. Extremely compact design, only 175mm in length, for access into tight spaces. Fitted with an advanced, heavy-duty chuck that provides increased bit grip.

- No Load Speed: 0-550/0-2,000/min.

- Impact Rate: 0-32,000/bpm
- Max. Torque: 135Nm
- Capacity: Steel 16mm, Masonry 16mm, Wood 89mm
- Weight: 2.2kg

1 x 18V M18 FID2 FUEL™ Impact Driver has a 1/4in Hex chuck for quick and easy bit change. With a Milwaukee® designed and built brushless POWERSTATE™ motor for heavy application, under load. DRIVE CONTROL™ allows the user to shift into 4 different speed and torque settings to maximise application versatility.

- No Load Speed: 1,900/2,800/3,600/0-3,600/min.
- Impact Rate: 1,200/3,400/4,300/0-4,300/bpm
- Torque Settings: 119/176/226/0-226Nm
- Max. Bolt Diameter: M16

1 x 18V M18 FJS FUEL™ Top Handle Jigsaw is fitted with a Milwaukee® designed and built brushless POWERSTATE™ motor for fast cutting and long tool life. The Milwaukee® patented FIXTEC blade clamp provides fast and easy blade change. Keyless bevel facility on the base plate allows for adjustment between 0-45°. With a 5-stage pendulum action for increased cutting performance.

- Strokes No Load: 0-3,500/min.
- Stroke Length: 25mm
- Capacity: Wood 135mm, Metal 10mm
- Bevel Capacity: 45°

1 x 18V M18 CCS55 FUEL™ Circular Saw 165mm, with a POWERSTATE™ motor for up to 5x longer motor life, up to 30% faster cutting and up to 25% more power. REDLINK PLUS™ intelligence system delivers the most advanced digital overload protection for tool and battery and uniquely enhances the tool performance under load.

- No Load Speed: 5,000/min.
- Max. Cutting Depth: @90° 55mm, @45° 41mm
- Blade: 165 x 6mm Bore
- Weight: 3.2kg

1 x 18V M18 CAG125X Angle Grinder 125mm, with a POWERSTATE™ motor for up to 10x longer motor life. 100% tool-free wheel change thanks to integrated FIXTEC system. Removable dust screen to prevent debris entrance, prolonging motor life.

- No Load Speed: 8,500/min.
- Cutting Depth: 33mm
- Spindle Size: M14
- Weight: 2.5kg

1 x 18V M18 TLED LED Torch work light, offering both long bulb life and run time. With sealed aluminium head for weather resistance and 135° rotating head to direct its bright, white beam.

- Also supplied with: 3 x 18V 5.0Ah Li-ion Batteries, 1 x 12-18V M12-18 FC Charger and 1 x Tool Bag.

Power Saws

700W Jigsaw 110V

A pendulum action jigsaw with a powerful 700W motor.

- Powerful 700 Watt motor with variable speed delivers fast cutting action up to 3,100 strokes per minute
- Quick and easy patented keyless blade change system accepts T-shank blades
- Patented anti-vibration counterbalance mechanism and rubber grip provide smooth operation
- 4-position orbital pendulum action controls the aggressiveness or smoothness of cuts
- Tool-free adjustable shoe with anti-scratch cover bevels to 45° in both directions
- Full wave electronic speed control with feedback ensures that blade speed is maintained under any load for a consistent finish across all materials
- Supplied complete with 1 high performance jigsaw blade, anti-scratch cover, anti-splinter insert, dust extraction adaptor and heavy-duty carrying case
- DeWalt model DW331K

BS250 Benchtop Bandsaw 350W 240V

The Record Power BS250 Benchtop Bandsaw has a strong steel frame, dynamically balanced bandwheel, cast iron table and an induction motor. The table tilts from 0-45°; on a solid trunnion with easy to read scale. Fitted with a strong fence that has a cam action lock for ease of use and simple tension adjustment for clamping strength (clamps at rear of table). Its blade guides are simple to set and easily adjustable.

The BS250 has a solid, finely ground cast iron table top provides an ideal, low friction work support. With a strong tension system that requires more than adequate tension for blade capacities of this model and 'sealed for life bearings' that require no maintenance during the working life of your machine.

A compact machine designed to offer those with limited space or budgets a real bandsaw with sensible capacity and performance, as an alternative to lightweight hobby machines. The machine can be bench mounted or fitted to the optional stand and wheel kit (NOT SUPPLIED) providing great flexibility in a tight space.

Includes 1 General Purpose blade

HiKOKI Slide Compound Mitre Saw 216mm 1100W 240V

The HiKOKI C8FSHG Slide Compound Mitre Saw has a compact slide system that eliminates the need for rear clearance, meaning it can be used in compact work spaces and even operated close to a wall. Its adjustable slide fence provides increased better workpiece support.

The extendable sub-table with measuring guide can be set to required width, ensuring a more precise cut. There is also a laser marker that can be adjusted to either the left or right side of the blade.

Supplied with: 1 x Extension Table, 1 x Dust Bag, 1 x Vice Assembly and 1 x Wrench

Specification:

- Input Power: 1,100W
- No Load Speed: 5,300/min.
- Blade: 216 x 30mm Bore
- Cross Cut 0°: 65 x 280/54 x 305mm
- Mitre Cut 45°: 65 x 203/54 x 210mm
- Left Bevel 45°: 38 x 280/26 x 305mm
- Mitre Capacity: 48° Left
- Bevel Capacity: 47° Left/ 2° Right

Versatile Power Pro 900 Bridge Saw 900W 110V

The Vitrex Versatile Power Pro 900 Bridge Saw has a direct drive that produces a constant cutting speed for ultra-smooth cuts, and a thermal overload that prevents overheating. It has a large water tray and submersible pump that delivers water to the cutting wheel, for essential cooling.

The Bridge Saw has an oversized bench style slotted aluminium cutting table with integral drainage with a side ruler and locking mitre guide for perfect straight cuts. The mitre is fully adjustable for diagonal tile cuts, 0-45°. The bridge also tilts to provide 0-45° mitre cuts. It has convenient built-in carry handles and adjustable wheels that allow for easy transport and repositioning, sturdy folding leg supports and detachable lower shelf.

Supplied with: 1 x Fold-Out Stand With Wheel Attachments, 1 x Convenient Storage Shelf, 1 x 200mm Continuous Rim Wet Diamond Blade, 1 x High Volume Water Pump, 1 x Angle/Rip Cutting Guide and 1 x Handle.

Specification

- Input Power: 900W.
- No Load Speed: 2,800/min
- Cutting Depth: 35mm.
- Cutting Angle: Mitre: 0-45°, Diagonal Tile Cuts: 0-45°.
- Weight: 48kg.

Routers

1/4in Premium Plunge and Fixed Base Combi Routers - 900W 110/230V

These premium plunge and fixed base combi routers from DeWalt are an ideal tool for beading, template work, profiling, trenching and dovetailing. Designed with full wave electronic speed control and feedback, ensuring the selected speed is maintained under any load for a consistent finish in all grades of timber, aluminium and plastics. They also have variable speed control (16,000 to 27,000/min), allowing the router's bit to be optimised for application.

The compact, lightweight design increases ease of use and user comfort and the plunge base incorporates fine tune rod for precise depth adjustment, while the aluminium motor housing can be transitioned quickly to a fixed base attachment increasing the versatility of the machine. The five position adjustable turret enables stepped or repeated plunge cuts with the over moulded rubber handles providing a comfortable and secure grip. The dual LED lights increase the visibility around the router bit during operation, while the multiple spindle lock detants enables quick and simple router bit change.

- Values include:
- Hand/arm vibration: 7.0m/s²
 - Uncertainty K 1 (vibration): 2.7m/s²
 - Sound pressure: 77dB(A)
 - Uncertainty K 1 (sound): 3.0dB(A)

Sanders

DS300 Cast Iron Disc Sander 305mm (12in)

The Record Power DS300 disc sander features a cast iron body, disc and table. This machine is more than capable of withstanding heavy sanding tasks. The powerful 1hp motor provides plenty of power and torque to easily handle large sections of timber.

The finely ground cast iron table can be tilted from 0 - 45°, enabling precise sanding of mitres and bevels. A sturdy rack and pinion mechanism is used to tilt the table, giving extra strength to support heavy timbers.

Many machines may look similar - but build quality, materials and power differ greatly, as does performance. The Record Power DS300 is for you and should not be confused with cheap lookalikes. The build and performance will speak for themselves.

- Specification
- Input Power: 1 hp.
 - Disc Speed: 1,420rpm.
 - Disc Diameter: 305mm.
 - Table Size: 435 x 165mm.
 - Size: D450 x W510 x H400mm.
 - Weight: 33kg.

Dust Extraction

DX1000 Fine Filter Extractor 45 Litre

The Record Power DX1000 Fine Filter Extractor is designed to filter down to 0.5 microns, featuring a two stage filtration process for extra fine dust. Ideal for all types of wood dust, even MDF.

Minimises the amount of harmful dust in the workshop. Particularly useful for fine dust producers such as saws or sanders. This compact but powerful machine is ideal for workshops with limited space or budget.

- Specification
- Input Power: 1.200W
 - Filtration: 0.5 Micron
 - Air Flow: 53 litres per second

Plastic Forming

432 x 228mm Vacuum Former

The C R Clarke 725FLB quickly, efficiently and consistently produces professional, high quality, high definition vacuum formings on a small to medium scale as required by model makers, development engineers and students.

- 228 x 432mm (9 x 17in.) forming aperture
- 6mm (0.25in.) max material thickness
- 140mm (5.5in) max mould height
- Digital timer with alarm
- 4 zone, Ceramic Heater system with heater mode display
- Heat resistant moulded RTV silicone seals
- Blow release
- Mechanical interlock prevents moulds damaging heaters

25 Plastic Injection Moulding Machine

The C R Clarke type 25 injection moulding machine produces dense, production quality mouldings up to 25g. It is also ideal for demonstrating the principles of injection moulding techniques.

A female mould (in two or more pieces) is manufactured from heat-proof material. Granulated plastic is heated to its molten state, then pressed (injected) into the mould. After cooling, the mould is taken apart and the plastic component is removed.

A range of demonstration moulds are available separately, including a blank for you to machine to your own design.

A range of plastics are also available in suitable granular form.

- Temperature controlled heating barrel
- Rack and pinion ram
- Over-centre mould closing system
- Automatic product releasing system
- Calibrated ram to assist in determining product volumes
- Supplied with 2kg of polyethylene (PE) granules
- **C R Clarke type 25**

Folding Jigs

These folding jigs from C R Clarke are a useful accessory to their range of strip heaters. Available in working lengths of 600mm, 1000mm and 1500mm, the jigs are adjustable from 160° obtuse to 30° acute.

The calibrated protractors ensure consistent setting, with hand knobs for easy adjustment. The adjustable work stops can also be used to hold the material in the folding jig, allowing the operator to continue with other work while the folded material cools.

- Bend angle adjustable from 160° obtuse to 30° acute
- Models available with 600, 1000 and 1500mm working lengths

Fan Circulated Ovens for Dip-Coating, Press-Forming & Thermo-Forming

These C R Clarke fan-circulated ovens are ideal for heating materials before dip-coating, dome blowing, press-forming and thermo-forming. They are also suitable for pre-drying materials before vacuum forming.

The ovens are constructed using high quality insulation for optimum energy efficiency and are fitted with digital temperature controllers allowing them to be operated at temperatures up to 350°C.

Optional stands with castors are available and permit easy movement if required.

- Heating for dip coating, dome blowing, press forming, thermoforming and pre-drying
- Digital readout temperature controller
- 50mm (2in.) insulation
- 350°C maximum operating temperature
- Castor stands available separately

Dip Coating Equipment

C R Clarke's range of dip coating equipment operates on the following principle:

A metal component is heated in an oven. After heating, it is removed from the oven and dipped into a bath of powder, which has been fluidised using high volume, low pressure air from a blower or the pressure outlet of a suitable vacuum-forming machine. The powder melts onto the hot metal, which is then removed from the powder. The heat in the metal allows the powder to flow to form a smooth coating.

The coating hardens as it cools, giving a hard-wearing coated surface.

- **Range includes:**
- Blower unit
- Fluidised baths in a range of capacities
- Stands/trolleys
- Available separately or as a suite

Hot Wire Cutter & Sculptor and Accessories

The Triform 180 from C R Clarke is a 3-in-1 machine that cuts and sculpts expanded thermoplastic material as well as bending thermoplastic sheet up to 6mm thick.

Separate heating wires are used for line bending and sculpting, optimising performance in both modes. A toroidal transformer provides safe low voltage power to the heating wires.

The local line bending feature uses a guarded hot wire for safety. A calibrated work table provides easy setting of the bend position.

In hot wire sculpting mode the operator can tilt the wire bow to cut at 90°, 67.5°, 60° and 45°. A pneumatic foot switch energises the hot wire or sculptor tool only while cutting. This results in safer operation and reduces fume emissions during cutting to a minimum.

- 180mm (7in.) working length (cutting)
- 300mm (12in.) working length (bending)
- 480mm (19in.) throat depth
- Work table calibrated in metric & imperial units
- 90, 67.5, 60 & 45 degree cutting angles
- Foot switch helps to reduce fumes
- **C R Clarke type Triform 180**

A Desktop Vacuum Former to Help You Bring Your Ideas to Life

The Mayku FormBox puts the power of making in your hands and can turn your classroom into a creative powerhouse, giving students a hands-on STEM learning experience. Powered by any vacuum cleaner, it works with a range of materials and helps you to bring your creative ideas to life.

Packing industrial strength into a small space, the desktop vacuum former is a powerful, portable learning tool. Create engagement in STEM curriculums and allow cost-effective exploration of product design, technology, manufacture and business concepts.!

HOW IT WORKS

Create: 3D print, sculpt or find your shape and place it on the FormBox bed.

Form: The FormBox forms a sheet of material around your shape creating a mould in seconds.

Multiply: Fill your mould with materials such as chocolate, soaps, resin, plaster or even concrete.

Result: Take it out and bring your first collection of products to life.

- 200 x 200mm bed size
- 160°C to 340°C heater range
- Compatible with PETg, HIPS, ABS, polystyrene, polycarbonate, polyethylene and acrylic PMMA from 0.25 to 1.5mm thickness
- Desktop machine 466 x 274 x 315mm
- Universal adaptor to fit almost any vacuum cleaner
- Automatically switches the vacuum on when required
- UK mains cable

- White HIPS
- Supplied in a **pack of 30**

£30.85

Order code 70-0029

Hot Wire Strip Heaters

The C R Clarke 500 and 920 hot wire strip heaters are designed to locally heat thermoplastic sheet materials of thicknesses between (typically) 0.5mm and 6.0mm to allow bending.

The machines operate by heating a thin (0.9mm) diameter resistance wire, located in a guard channel beneath the material to prevent accidental touching. The wire sits approximately 4mm below the material and there is no physical contact between the wire and the material. The heating wire is powered from a transformer and operates at approximately 10 Volts.

A calibrated scale on each side of the working area assists the user with both alignment and measurement of the bend position.

- 500 or 920mm (20 or 36in.) working length
- Folds 1 to 4mm (0.04 to 0.16in.) thick material
- Single heat setting
- Single wire capacity for tight accurate bends
- Guarded hot wire for safety

For Technical specification vist www.rapidonline.com

S and D Range Single/Double Sided Hot Wire Strip Heaters

This range of hot wire strip heaters provides a quick and efficient solution for the local heating of thermoplastic sheets up to 10mm (3/8in.) thick. It uses single-sided (600S, 1000S & 1500S) or double-sided (600D, 1000D & 1500D) multiple wire heating.

- Range of working lengths: 600/1000/1500mm (24/40/59in.)
- Single or double sided heating
- Twin wires for fast heating of materials up to 10mm thick
- Adjustable wire height up to 8mm for folding a greater range of materials

We bring
STEAM to life

- Adjustable work stop calibrated in metric & imperial units
- Adjustable wire spacing for different bend radii
- Clamp beam to prevent bowing during heating cycle
- C R Clarke S and D ranges

563535

Schred Waste Plastic Recycling Equipment

C R Clarke's Schred is an in-house plastic recycling system.

The equipment is suitable for use with most types of plastic, in particular the commonly used ones such as HDPE and LDPE (the materials most milk bottles are made from) and HIPS (used to make vacuum forming sheets).

The process starts with shredding your used plastic using the R25 Schredder that chips plastic items into small pieces, creating a re-usable material. This material is then re-formed into 'new' plastic sheets using the R30 sheet press.

- **The Schred range includes:**
- R25 Schredder - converts waste plastic into chips ready for re-use. Available in 230V mains voltage (single-phase) or 400V (3-phase) options
- R30 sheet press - heats and compresses the chips into a sheet
- R30S - an optional stand for the R30 sheet press
- R30T2 - a PTFE coated cassette mould for the R30 - produces 458 x 254mm sheets
- R30SC - an optional cooling system for the R30S stand
- R30M01 - a Frisbee mould for the R30 sheet press

Compressors

SEALEY

2.0hp Direct Drive Compressor

A 2.0 horsepower direct-drive compressor with a 50 litre storage capacity.

- Air displacement: 7cfm
- Aluminium cylinder head with cast iron cylinder gives added resistance to wear
- Suitable for general purpose workshop applications
- Pump head directly coupled to heavy-duty induction motor for reliable and quiet operation
- Welded tank complies with latest European standards
- Fitted with fully automatic pressure cut-out switch and twin gauges displaying tank and working pressures
- Fitted with ASTA/BS approved non-rewirable plug
- **Sealey model SA5020**

SEALEY

Compressors Belt Drive 3hp with Cast Cylinders

Our top of the range single phase compressors are suitable for the professional workshop and are fitted with a genuine 3hp motor. Twin capacitors and a centrifugal switch aid trouble free starting on a good 13Amp supply. However on these models we recommend fitting a 16Amp plug and connecting to a 20Amp supply protected by a type C circuit breaker. Pumps feature heavy-duty full cast cylinders, capped by alloy heads for improved heat dissipation and long life. Heavy-duty drive guards protect belt and flywheel that is designed to force air over the pump to aid cooling. Supplied with full CE certification, test certificates and operating/maintenance manual.

SEALEY

Compressor 100ltr Direct Drive 3.0hp

V-Twin pump with aluminium cylinders and cast iron liners for reduced weight and improved resistance to wear. Suitable for general purpose workshop applications. Pump directly coupled to heavy-duty induction motor for reliable operation. Precision welded receiver tank manufactured to meet Pressure Vessel Directive 87/404/EEC. Fitted with fully automatic pressure cut-out switch, air regulator and pressure gauges for tank and supply. Supplied with handle and wheels for easy manoeuvrability. Fitted with ASTA/BS approved non-rewirable plug.

- Air Displacement: 12.6cfm.
- Maximum Free Air Delivery: 8.75cfm.
- Maximum Pressure: 130psi/9bar.
- V-Twin pump with aluminium cylinders and cast iron liners for reduced weight and improved resistance to wear.
- Suitable for general purpose workshop applications.
- Pump directly coupled to heavy-duty induction motor for reliable and quiet operation.
- Precision welded receiver tank manufactured to meet Pressure Vessel Directive 87/404/EEC.
- Fitted with fully automatic pressure cut-out switch, air regulator and pressure gauges for tank and supply.
- Supplied with handle and wheels.
- Fitted with ASTA/BS approved non-rewirable plug.
- Model No. SAC10030
