Providing the power within automotive environments as varied as motorcycle engines, lawn mowers and assisted mobility vehicles, Yuasa are world leaders in cyclic rechargeable batteries and lead acid batteries.

Ideal for using in deep discharge applications, Yuasa lead acid and SLA batteries feature unique barrier prevention and separator systems, which help to extend the life of the battery.

Proud of its long history of lead acid battery design, development and research, Yuasa has consistently met the demands of its customers. Yuasa has been a champion within the motorcycle industry, supplying such famous two-wheel names as Harley-Davidson, Honda, Kawasaki, Buell, Cannondale and Polaris Victory. So successful has Yuasa become that around 90% of all motorcycles are factory fitted with Yuasa lead acid batteries.

Rapid Online provide a comprehensive range of capacitors and passive components from the industry's leading manufacturers.

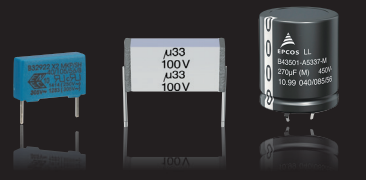

The capacitors stocked include electrolytic capacitors and non-electrolytic capacitors, such as ceramic capacitors, variable capacitors, polyester capacitors and power capacitors across the entire capacitance range. All in-stock items are despatched the same day. If you are looking for high quality capacitors for your application requirements and we do not have what you need today, we may be able to source the electronic components for you.

Competence in capacitors

Film, Suppression and Memory Backup

The reliability and self-healing properties of Wima capacitors make them very popular to high volume customers, who also appreciate the environmental considerations that go into their manufacturing process. Wima film capacitors, in through-hole or SMD configurations, are free of toxic substances such as lead, hydrocarbon chloride, PBB/PBDE, cadmium and mercury.

For full details and pricing visit www.rapidonline.com/wima

WÜRTH ELEKTRONIK

ELECTROLYTIC CERAMIC SUPPRESSION

For the first time in their history Würth Electronics rounds out its EMC offerings by adding a breadth of certified electrolyte, ceramic and film capacitors to its portfolio. These ranges include X2 Class foil capacitors which work hand in hand with their line of filters. MLCC capacitors are available in sizes from 0402-1812 in various capacitances and voltages as well as range of Snap-in, through hole and SMD electrolytic capacitors for General and special circuitry.

ARCOL

Arcol Power Resistors

One of the leading names in resistor technology, Arcol resistors consistently meet the demands of high voltage power.

Rapid is one of Arcol's key UK distributors and can supply an extensive range of Arcol's carbon composition and aluminium clad resistors - products designed to be integrated into prototyping, development and assembly work in automotive, medical and lighting applications. All Arcol resistors are high performance devices with an industry-standard range of resistance values.

MOXIE NTC Thermal Sensors

These solid state MOXIE thermal sensors are variable resistance devices that comprise NTC thermistors with highly specific transition regions. When the sensor heats up the normally high resistance falls rapidly once the transition temperature has been reached. On cooling, the devices revert back to the original high resistance, low hysteresis.

Suitable applications for these devices include: temperature protection sensors, control and limiting voltage, current and frequency limiters.

- Housed in a TO-18 package which is available in either standard (no tab), vertical or horizontal tab mounting
- The devices are extremely sensitive
- High levels of reliability

788 Series

16A Relay Modules with Small Switching Relays

These relay modules are available in a choice of contact configurations and coil voltages, both AC and DC. The relay socket is DIN-rail mountable and the relays and switching status LED indicator simply plug in, using a robust, easy-to-use lever that lifts and ejects the components thus simplifying replacement. The relay modules are ideal for use in industrial and process automation switching relay applications.

- Integrated test ports for simple and efficient troubleshooting
- Status indication through pluggable LED module with integrated recovery diode
- Insulated, pluggable jumper system suitable for both coil and load side
- WMB Marking
- Integrated recovery diode
- Mechanical life 30 x 106 operations
- CAGE CLAMP termination

Rapid Online stocks a comprehensive range of industrial switches, microswitches and toggle switches including control unit switches, edge and DIL switches, key and keyboard operated switches, latching PCB switches, push-button switches, rotary, slide and tactile switches.

Products are sourced from the industry's leading manufacturers, such as SCI, Bulgin and CamdenBoss.

If you are looking for high quality switches for your application requirements and we do not have what you need today, we may be able to source these components for you. Please get in touch for details.

Switches are electronic components that are used to break electrical circuits, interrupting the current or diverting it from one conductor to another. They can control the flow of power within a device, domestic circuit or appliance, and switches are found in all manually or automatically operated circuits.
