Rapid part of the **CONRAD** Group

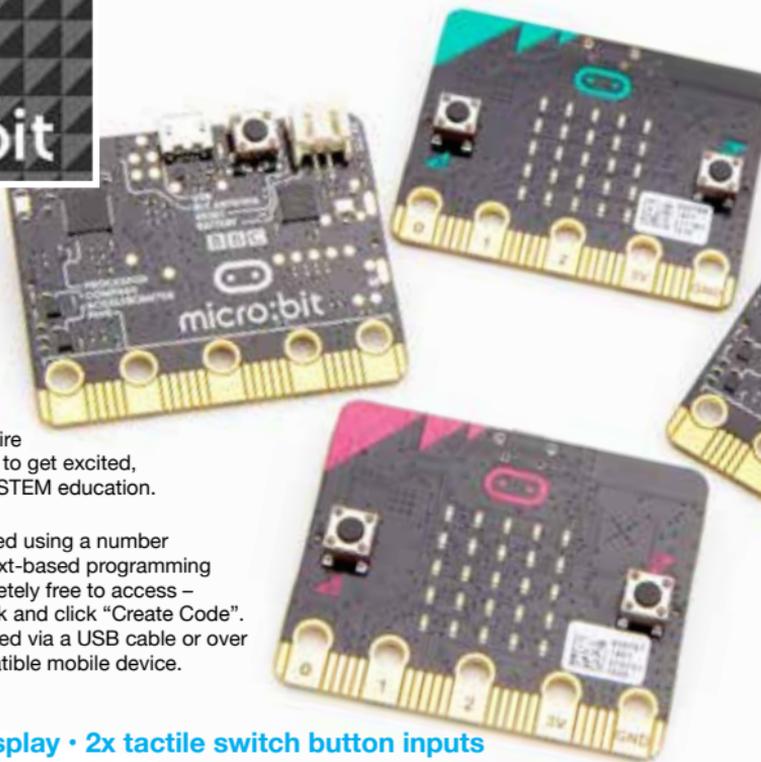

The BBC micro:bit is an educational platform which is perfect for learning the basics of coding and getting started with embedded computing. It's a low cost but feature-packed device that will inspire both students and teachers to get excited, engaged and enthralled by STEM education.

micro:bit can be programmed using a number of different graphical and text-based programming languages which are completely free to access – just visit [www.microbit.co.uk](http://www.microbit.co.uk) and click "Create Code". Programs can be downloaded via a USB cable or over Bluetooth 4.0 from a compatible mobile device.

### Key features:

- 5x5 LED matrix display • 2x tactile switch button inputs
- Electronic compass • Accelerometer • 3x input/output rings
- Bluetooth 4.0 connectivity

Colours may vary.

### COMPLETE PACKAGE

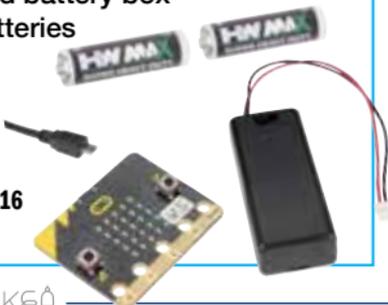

Kit includes:

- 1x micro:bit board
- 1x USB download cable
- 1x switched battery box
- 2x AAA batteries

Only

**£15.00**

Order code 75-0116

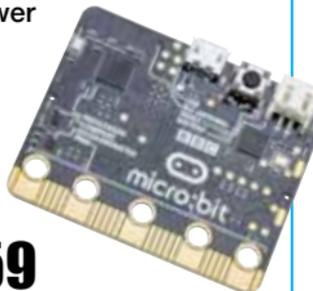

### MICRO:BIT ONLY

Requires battery box and batteries or alternative form of 3V power supply

Only

## mBot Ranger

### The Transformable STEM Robot Kit

The mBot Ranger builds on the basics of the mBot but includes a more powerful main board, more sensors and more structural parts. The instructions show you how to use the kit to build 3 very different robots – the Land Raider off road tank, Dashing Raptor and self-balancing Nervous Bird.

mBot Ranger includes a light sensor, ultrasonic distance sensor, line follower, gyroscope, temperature sensor and sound sensor. It also has 12 RGB LEDs and a buzzer for outputs.

#### Programming the mBot Ranger

You can program the mBot Ranger using mBlock for Windows PCs and Mac or Makeblock HD for iPad and Android tablets.

Order Code	Description	Price
75-0699	mBot Ranger	<b>£118.80</b>

# Programming your Makeblock mBot Ranger

There are a number of different ways to program your mBot Ranger

## mBlock

### Compatibility

Windows, Mac

mBlock is a drag and drop interface based on the ever popular Scratch programming language.

It's really easy to learn, very powerful and the chances are, your students have already encountered Scratch.

You can download your programs to your robot via a USB cable, using the 2.4GHz RF adaptor or over Bluetooth if your computer has a compatible Bluetooth interface.

## Accessories

For mBot Ranger Robot

### 6-Legged Expansion Pack

**£18.00**

Order code 75-0705

### Mini Gripper

The Me RJ25 Adaptor is required to connect the Gripper to the main board.

Mini Gripper

**£14.40**

Order code 75-0706

Me RJ25 Adaptor

**£2.75**

Order code 75-0712

### Robot Gripper

The Me Dual DC Motor Driver is required to connect the Mini Gripper to the main board of the mBot or mBot Ranger.

Robot Gripper

**£26.40**

Order code 75-0703

Me Motor Driver

**£11.98**

Order code 75-0713

## Makeblock HD

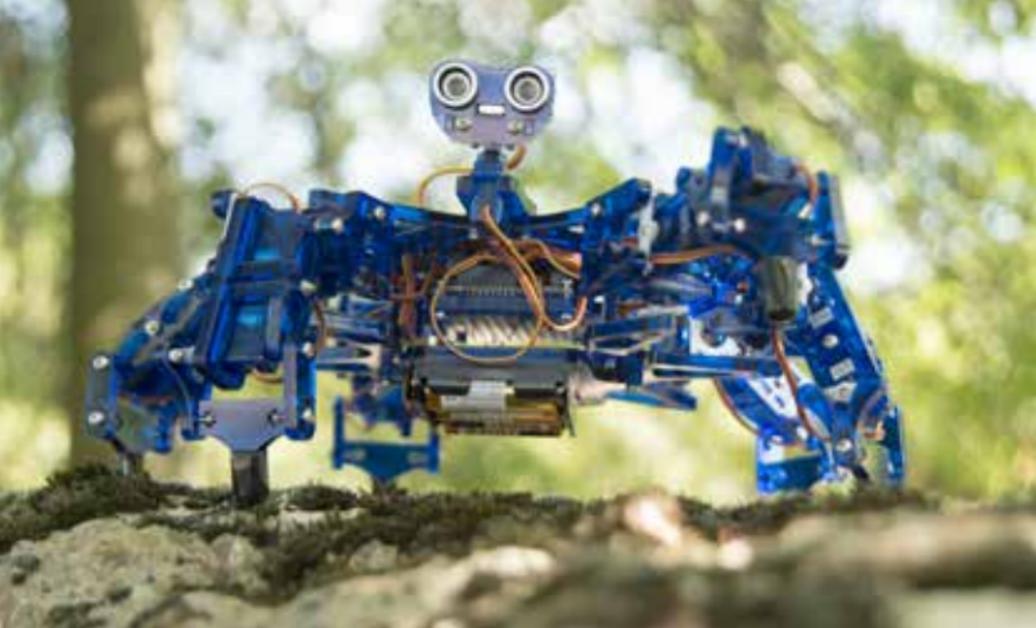

### Compatibility

iPad3 and above,  
Android tablets  
running 4.0  
and above

Makeblock HD

is a tablet application which allows you to control your robots, read data from sensors and program using the mBlockly interface. The app requires a Bluetooth connection to the robot so it isn't compatible with the 2.4GHz version of the mBot.

HEXY

# THE HEXIPOD ROBOT KIT

The Hexy Hexapod from Seeed Studio includes everything you need to build your own 6-legged robot, there's even a spare leg!

- Arduino compatible microcontroller included
- Bluetooth module for remote control
- Ultrasonic distance sensor
- Hexy is 305mm wide by 178mm long
- Weight 1.5kg

 **seeed**  
originals

**£202.82**

Order code 75-0409

**£20.30**

Order code  
13-1192

## Magician Chassis Robot

The self assembly kit comes complete with two high torque motors with built-in gearboxes, wheels, rollerball front wheel and 3xAA battery holder. The cleverly perforated chassis allows you to easily mount your PCBs using PCB pillars and screws.

- Overall dimensions 175 x 125 x 75mm
- 65mm diameter wheels

## Robot Tank Chassis

The chassis has built-in motors and gearboxes which you can easily interface with PICAXE, GENIE, Arduino or any other microcontroller system, as well as radio control systems. The RP5 tank track chassis is supplied ready assembled – just add your own control system and batteries!

- Dimensions: 175 x 135 x 60mm
- 2x 280 type motors
- 80:1 gear ratio
- Rubber tank tracks
- 6x AA Battery holder included

**£37.03**

Order code  
13-1194

**£16.72**

Order code  
75-0621

**Pololu**  
Robotics & Electronics

## Zumo Chassis Kit

- Composed of sturdy black ABS
- Features a compartment for 4x AA batteries
- Sockets for two micro metal gearmotors
- Acrylic plate for mounting hardware

*Note: Motors and batteries are not included.*

**4WD Hercules  
Robotics Platform  
Inc. Motors and Control Board**

- Arduino compatible & programmable controller
- Wireless interface
- Motors are plug-and-go compatible with the Hercules controller
- Battery and charger included
- Dimensions: 216 x 138 x 90mm

**£133.49**

Order code  
75-0407

**All Metal Chassis  
4WD Robot Kit (ATV)  
Inc. Motors & Fixings**

- 4 x DG01D motors 48:1 ratio gear metal output shaft
- 5 x AAA battery holder
- Supply voltage: 6 to 9V DC
- Dimensions: 178 x 145 x 78mm

**£36.52**

## Grove Smart Plant Care Kit for Arduino Compatible Boards

- Build a simple but functional control system
- Monitor environmental parameters
- Expand the system as your confidence grows

Included in the Smart Plant Care Kit:

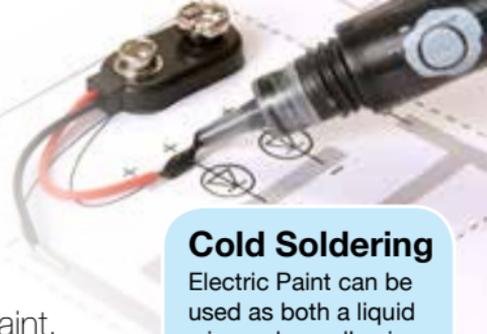

- Grove - Base Shield: The expansion board to connect Grove modules to your Arduino
- Grove - Temp & Humidity Sensor: To measure the temperature and humidity
- Grove - Moisture Sensor: To measure the soil moisture
- Grove - Sunlight Sensor: To measure illumination intensity
- Grove - OLED Display 1.12in.: To display parameters
- Grove - Encoder: To select and adjust parameters on the display
- Grove - Button: To select parameters
- Grove - Relay: To control the water pump
- Grove - Water Flow Sensor: To measure the speed and volume of water flow
- 12V Water Pump: To pump the water

**£47.59**  
Order code 75-0486

Bare Conductive's Electric Paint is just like any other water-based paint, except that it conducts electricity! This means that you can paint wires or sensors directly onto almost any material.

### Cold Soldering

Electric Paint can be used as both a liquid wire and an adhesive. Use it to attach components to a range of materials. This is a great **alternative to the soldering iron** either when you're in a hurry, or working with children!
