

HINTS & TIPS

THE BC 639 TRANSISTOR

Case package TO-92(A)

Identify the Emitter, Collector and Base of the BC 639 transistor. Hold the leads of the transistor between finger and thumb with the flat side facing towards you and the leads pointing downwards.

The **Base** is on the **right**

The **Collector** is the **centre** connection

The **Emitter** is on the **left**

Strip the insulation from single core wire.

Use **black** for the **Emitter** (01-0601).

Use **red** for the **Collector** (01-0616).

Use **yellow** for the **Base** (01-0620).

Slide about **5mm** of each colour onto the relevant pin connection.
