

HINTS & TIPS

THE 106D THYRISTOR

Identify the Cathode, Anode and Gate of the Thyristor.

Hold the leads of the Thyristor between finger and thumb with the metal side facing towards you and the leads pointing downwards.

The **Gate** is on the **left**

The **Anode** is the **centre** connection

The **Cathode** is on the **right**

Strip the insulation from single core wire.

Use **black** for the **Cathode** (01-0601).

Use **red** for the **Anode** (01-0616).

Use **yellow** for the **Gate** (01-0620).

Slide about **5mm** of each colour onto the relevant pin connection.
