Rapid Education part of the CONRAD Group

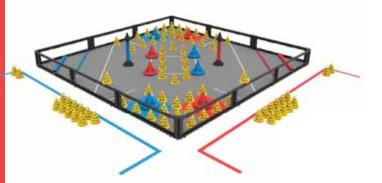

VEX Robotics Competition – In the Zone

The 2017/18 VEX Robotics Competition is here! Introducing "In the Zone".

THE AIM OF THE GAME

In the Zone is played on a 12ft x 12ft (3.6m x 3.6m) square field configured as shown. Two alliances – one "red" and one "blue" – composed of two teams each, compete in matches consisting of a fifteen second autonomous period designed to test students coding skills followed by one minute and forty-five seconds of driver-controlled play. The object of the game is to get a higher score than the opposing alliance by stacking cones on goals, by scoring the mobile goals in goal zones, by having the highest stacks, and by parking robots on the coloured tiles at the end of the match.

HOW TO TAKE PART

VEX: Firstly you'll need to get some VEX equipment to build your robot with. For new teams, we recommend either the Classroom and Competition Mechatronics Kit or Super Kit as a starting point.

VEX IQ: Firstly you'll need to get some VEX IQ equipment to build your robot with. For new teams, we recommend the Super Kit which contains everything you need.

You'll also need some programming software – for this we recommend either Modkit or ROBOTC, both of which are completely free to use

You'll also need some programming software – for this we recommend ROBOTC which is completely free to use.

Finally, you'll need to register your team at **www.robotevents.com**. Robot Events is the organisation that manages team registrations for the VEX Robotics Competition and VEX IQ Challenge globally and is not part of Rapid. Registration costs £125 for the first team and £75 for any additional teams. When you register, you'll be sent a sample of the game elements that you need to design your robot around.

Once you are registered, you can use Robot Events to find competitions that are local to you and sign up to take part.

To find out more about how to get involved, visit www.rapidonline.com/VEX, www.rapidonline.com/VEXIQ or contact education@rapidonline.com.

For ages 11 to 18

VEX IQ Challenge – Ringmaster

The 2017/18 VEX IQ Challenge is "Ringmaster".

THE AIM OF THE GAME

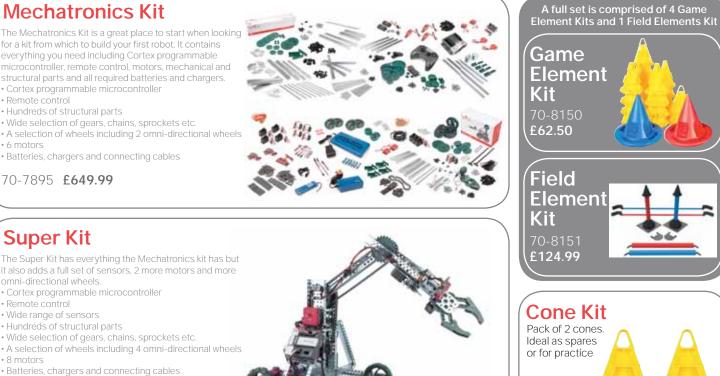

Ringmaster is played on a 4ft x 8ft (1.2m x 2.4m) rectangular field configured as shown. Two robots compete in the Teamwork Challenge as an alliance in 60 second long teamwork matches, working collaboratively to score points. Teams also compete in the Robot Skills Challenge where one robot takes the field to score as many points as possible. These matches consist of Driver Skills Matches, which will be entirely driver controlled, and Programming Skills Matches, which will be autonomous with limited human interaction, pushing the coding skills of the students to the limit.

The object of the game is to get the highest score by scoring coloured rings on the floor goal and on posts, by having uniform posts where all scored rings are the same colour, by emptying starting pegs of all their rings and by releasing the rings in the bonus Tray.

For ages 8 to 14

VEX ROBOTICS COMPETITION KITS

Mechatronics Kit

70-7894 £829.99

For a full range of add-on and spare parts, visit www.rapidonline.com/vex

VEX IO COMPETITION KITS

Super Kit

The Super Kit contains everything you need for your first competition robot including programmable brain, motors sensors, lots of structural and mechanical parts, remote control, and all batteries and chargers. Everything is completely reusable year after year.

- Over 850 structural and motion components
- VEX IQ Brain
- VEX IQ Joystick and Radios

70-7891 **£269.99**

- 4x Smart motors
- 7x Sensors (2x Touch LEDs, colour sensor, distance sensor, gyro sensor, 2x bumper switches)
- · All batteries, chargers and connecting cables
- Storage bin and tray for organised storage of all parts

Challenge Team Bundle

The VEX IQ Challenge Team Bundle is the ultimate kit for starting a VEX IQ Team. Whilst the VEX IQ Super Kit contains enough parts to build your first competition robot, this Challenge Team Bundle allows you to take your designs to the ultimate level by combining a VEX IQ Super Kit with an additional Competition Add-On Kit and a Foundation Add-On Kit.

- Thousands of structural and motion parts
- VEX IQ Brain
- VEX IQ Joystick and radios
- 6 Smart Motors (the maximum number allowed for the VEX IQ Challenge)
- 7 Sensors (2x Touch LEDs, colour sensor, distance sensor, gyro sensor, 2x bumper switches)
- 16 Wheels (including omni-directional)
- Chain and Sprocket Kit Tank Tread/Intake Kit
- · All batteries, chargers and connecting cables • 2 Storage bins and trays for organised storage of all parts

70-7953 £399.99

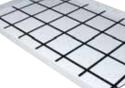

Full Field Perimeter and tiles

70-8152

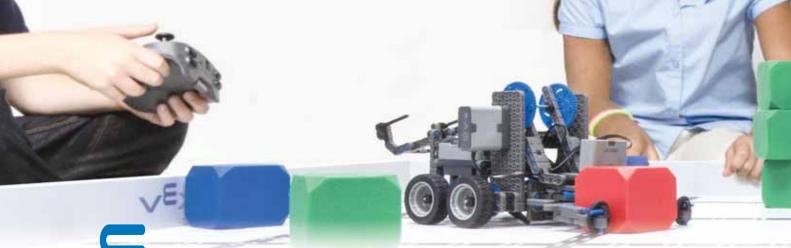

£4.99

Game Element

Kit Pack of 3 rings. Ideal as spares or for practice 70-8156 £2.99

For a full range of add-on and spare parts, visit www.rapidonline.com/vexig

VEXIC

SIMPLE

Designed to be easy for young students to use. Tool-less, snap-together pieces mean that students as young as 8 can build and drive fun robots like the Clawbot IQ or Armbot IQ in minutes. Plus, the free VEX IQ curriculum available from **www.vexcurriculum.co.uk** provides a comprehensive introduction to STEM principles from the ground up.

Classroom Bundle

FLEXIBLE

VEX IQ takes the complications out of robot design and construction. With 850+ pieces in each of the affordable yet extensive Starter Kits, students will be able to hit the ground running. New creations can be driven with a gamepad-style controller, run autonomously using advanced sensors, or a combination of both with the Super Kit.

Super Kit

The ultimate all-encompassing introduction to STEM and robotics; contains both a controller and advanced sensors.

- 850 Structural Components
 - Robot Brain & Battery
 Smart Motors
 - 4 Smart Mo7 Sensors*
 - 1 Controller & Batterv
 - 2.4 GHz Radios
 1 Storage Bin & Tray
 1 Programming software

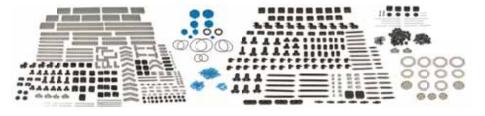

*2x Bumper Switches, 2x Touch LEDs, 1x Colour Sensor, 1x Gyro Sensor, 1x Distance Sensor

POWERFUL

Unleash the potential of educational robotics with VEX IQ. Whether it's the ability to use up to 12 Smart Motors or sensors at once, make chain or tank tread fit any length, swap gears and stay perfectly on pitch, or choose between two FREE software options designed specifically for budding programmers, your students won't grow out of VEX IQ any time soon.

The VEX IQ Classroom Bundles are designed to support classroom learning by providing enough equipment to support groups of 10, 20 or 30 students working in groups of two.

Each pair will have a VEX IQ Super Kit containing a VEX IQ Brain, Controller, 4 motors, 7 sensors and 850 structural parts as well as all batteries, chargers and download cables. Each kit is supplied in a stackable storage bin for easy storage at the end of each lesson.

The ROBOTC and Modkit programming languages are included with all VEX IQ starter kits and bundles. This means that absolutely everything you need to design, build and program robots is included.

All kits are supplied with Highrise cubes for use in your own classroom competitions. The 30 student bundle also includes a full VEX IQ Challenge field which can be built or packed away in minutes.

- $\boldsymbol{\cdot}$ Use the included Modkit or ROBOTC software to program your robots
- Classroom Curriculum available to download from www.vexcurriculum.co.uk
- Kits can also be used to enter the national VEX IQ Challenge
- •All kits include batteries, chargers and storage boxes for every robot

PROJECT IDEA

Here is a fun little project to control your Bit:Bot remotely using another micro:bit.

There are loads of ways of achieving this but this is a really simple one to get you started. Once you have mastered the basics, you can try adding reverse or perhaps use the addressable LEDs to greater effect!

What you will need:

- A Bit:Bot fitted with a micro:bit and 3 AA batteries
- A second micro:bit and battery box with 2 AAA batteries
- A computer and access to the micro:bit webpage

This example uses the JavaScript block editor to create the program. Head over to **microbit.org** and click on **Let's Code**. Then choose the **JavaScript Blocks Editor**.

You are going to need to create two programs – one to run on the standalone micro:bit (which will act as your remote control) and one to run on the Bit:Bot. We'll do the program for the remote control first. This program is made up of 2 main parts:

Let's break the program down and look at what it is doing:

The micro:bit radio can be used to transmit on 256 different channels or groups - 0 to 255. This means that you can share data between many micro:bits in the same group, or in a classroom environment it can be useful to assign each student their own group number to use so that their projects do not interfere with one another. In this case, we are setting this micro:bit to operate on group 1 the moment the program starts.

Next we have a **forever loop**. This means that the instructions in the loop are executed continuously over and over until the power is turned off.

@ acceleration (sg) www

The first block is used as the speed control. The micro:bit broadcasts a message or "packet" that is made up of two parts. Firstly, it sends the string "acc" which is short for acceleration. The name of this string is up to the user to define, you can call it whatever you like. Secondly, it sends the numerical accelerometer value of the Y axis, i.e. tilting the micro:bit forwards and backwards.

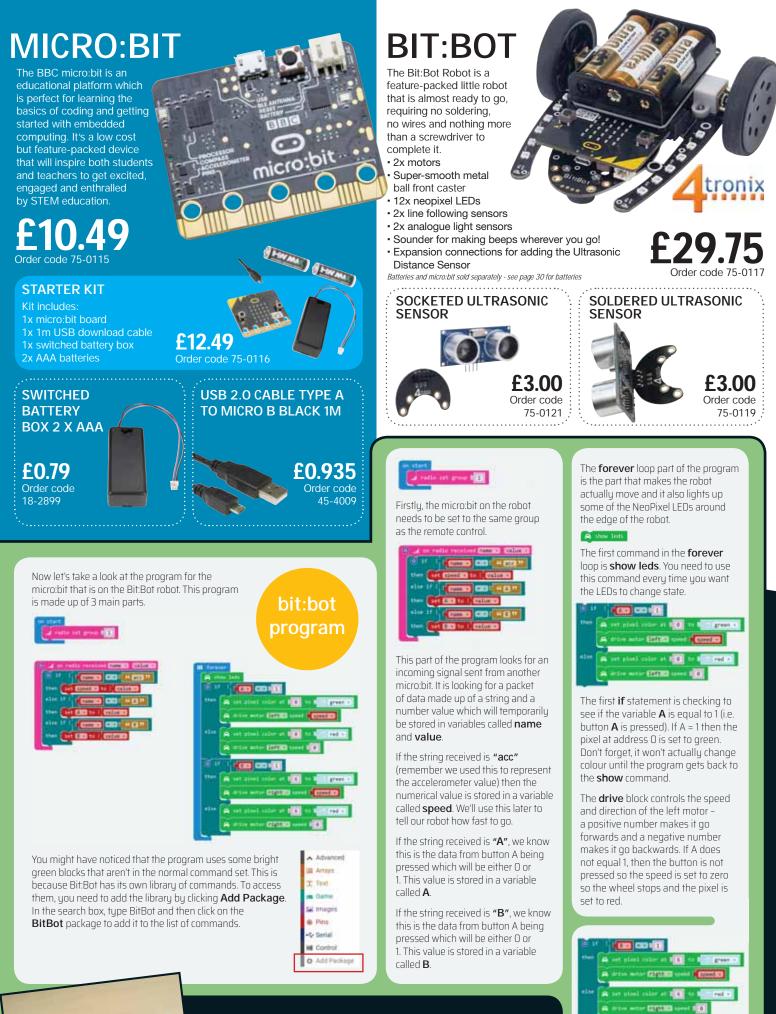

Next we have an **if** statement that checks to see if button A on the micro:bit has been pressed. If it has, the micro:bit will broadcast a packet that contains the string "A" and the number 1. It also switches on one of the LEDs at position 0, 0 of the display using the **plot** command. This is to show the user that the button on the remote has been pressed.

If the button is not pressed (**else**), the micro:bit broadcasts a similar packet, but with a O rather than a 1. It also switches off the LED at position 0, 0 using the **unplot** command.

This **if** statement is very similar to the one for the A button, but instead checks the B button and broadcasts a slightly different packet and uses an LED at location 4,0 to tell the user that the button has been pressed.

The second **if** statement is almost identical to the first, but it looks to see if the **B** button is pressed and controls the right wheel rather than the left.

Raspberry Pi 6

RoboHAT Robotics Controller

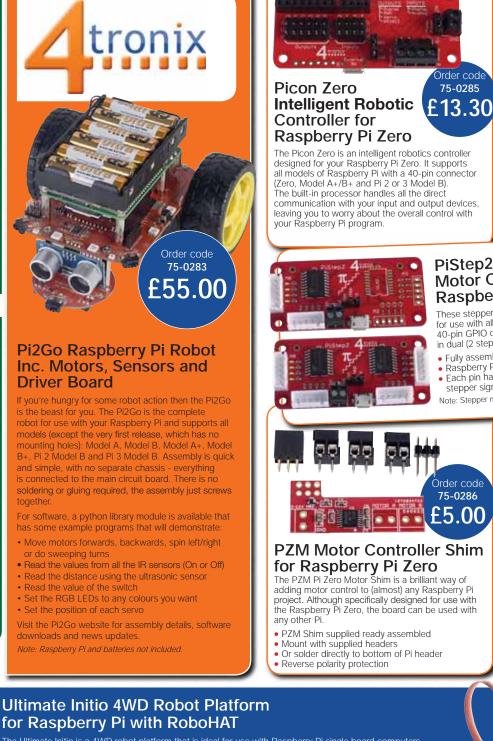

The RoboHAT is the complete robotics controller for your Raspberry Pi based mobile robot. The board

supports all models of Raspberry Pi that have the 40-pin connector (Model A+/B+, as well as Pi 2

Board for Raspberry Pi

• Python library module for super-easy use

Drder code 75-0284 19.95

The Ultimate Initio is a 4WD robot platform that is ideal for use with Raspberry Pi single board computers The platform is a doddle to assemble and easy to use and comes with the RoboHAT robotics board and an assembled 2DOF pan-tilt servo assembly, as well as a number of other sensors that make this platform extremely flexible and perfect for a wide range of projects.

The main chassis comes pre-built, with the wheels, motors, gearboxes, battery box and wheel sensors all in place. The powerful 170-size motor is coupled to a high-quality gearbox and there are built-in speed encoders on each side. Each wheel can be individually decoupled from the gearbox so you can run the robot in 1WD, 2WD or 3WD modes if you want

- · Main Initio chassis (with wheels, motors, gearboxes, battery box, wheel sensors, screws and all mountings)
- RoboHAT Robotics Controller Board 75-0284
- Pan-Tilt 2DOF assembly with servos (ready assembled)
- 2x IR Obstacle sensors
- 2x IR Line sensors • 1x Ultrasonic sensor
- All connecting cables as required for above items
- Build instructions and example code can be found on the 4tronix website

For full details and to see our full range of 4Tronix products visit www.rapidonline.com/4tronix

PiStep2 Dual/Quad Stepper Motor Controllers for **Raspberry Pi**

These stepper motor control boards are designed for use with all versions of the Raspberry Pi with the 40-pin GPIO connector. The boards are available in dual (2 steppers) or quad (4 steppers) versions.

and 3 Model B).

Perfect with Pi

Supplied fully assembled

- Fully assembled no soldering required
- Raspberry Pi Zero form factor Each pin has an associated LED to see
- stepper signals
- Note: Stepper motors and Raspberry Pi not included.

Educational Traffic Light for Raspberry Pi

The Pi-Stop is an educational traffic light project for Raspberry Pi. The low cost hardware module is designed to allow you to use your Raspberry Pi to take the first steps into interfacing with the real world. You'll be on the first rung of the Internet of

Things ladder as soon as the lights change to green. The brilliant thing about the Pi-Stop is the familiarity of the elements, everyone knows what they are and how they can be used. Note: Raspberry Pi not included.

Raspberry Pi 3 Model B 1.2GHz Quad Core 1GB **RAM WiFi and Bluetooth**

If your Internet connection was a bit slow on February 29th 2016 it was because the new Raspberry Pi 3 went on sale. The Raspberry Pi Foundation has persuaded their chip supplier, Broadcom, to build them a new processor with a 64-bit Cortex A-52 quad-core CPU running at 1.2GHz. They've also increased the speed of the RAM and the video processor (GPU) while keeping full code compatibility with the Pi 2. The Pi 3 is a complete drop-in replacement for the Pi 2 in fact, it fits the same cases, has all the same ports and GPIO pins, only a few LEDs have moved.

• 50% performance boost over the Pi 2

- Built-in Wi-Fi 802.11n and Bluetooth 4.1
- Fully compatible with the Pi 2 and Pi B+ Learn to code with free tutorials
- Learn electronics with hundreds of add-on boards
- Play retro-games on your HDTV (HDMI)

MORE THAN JUST A ROBOT

Engage your students with Edison, the programmable robot

Edison is a complete STEM teaching resource for coding and robotics education for students in **Keystage 2 and 3**.

Easy-to-use with no coding experience required, Edison offers unparalleled value-for-money and is supported by free downloadable lesson plans and activities.

Edison has built-in sensors, lights and sound so that you can concentrate on programming.

Edison can:

- Respond to light and sound Follow lines and avoid obstacles
- Read pre-set barcode programs Communicate with other Edison robots
- And so much more!

Edison 2.0

Edison can be programmed using free browser-based or downloadable applications which cater for all age groups and skill levels.

EdBlocks

The online EdBlocks programming environment is simple to use on both computers and tablets. EdBlocks contains more than 150 blocks, making it easy to experiment with programming. All the blocks are accessible through the main menu, organised into five different categories. Simply open one of the menus by clicking on it in the app, then select the block you want. Drag and drop each block to the 'start' block in the main programming area to add it to your program. It's that easy!

A free 39 page teachers guide containing 23 activities for your students is available to download.

Construct Your Dreams

mBot V1.1

STEM Robot Kit

The mBot is the perfect introduction to Makeblock. It's quick and easy to assemble but has plenty of sensors to keep your students interested. mbot has an ultrasonic distance sensor, can measure light levels, has a line follower and has a buzzer and RGB LED for outputs. The infrared sensors can be used to send messages and data between mBots and the robot can also be controlled with the infrared controller included in the kit (requires CR2025 coin cell).

Do I need the Bluetooth or 2.4GHz version?

The version you need depends on how you want to program your mBot. Essentially, the Bluetooth version is used if you want to program using an iPad or Android tablet and the 2.4GHz version is used if you want to use a Windows desktop PC, laptop or a Mac (although these can be used to program the Bluetooth version if the computer has a compatible Bluetooth feature)

Programming Software	For device type	mBot Bluetooth	mBot 2.4GHz
mblock	Windows and Mac	✓*	~
Makeblock HD	Tablets - iPad3 and above or Android 4.0 and above	~	×
mBot	Smart phones - iPhone 4S and above or Android 2.3 and above	~	×
mBlocky	Tablets - iPad3 and above	~	×

* Your PC or Mac must support Bluetooth 4.0

Add-On Kits

mBot 6-Legged

This kit is an expansion pack for the mBot robots which allows you make a six-legged walking robot based on the mBot chassis, motors, controller and sensors. Learn about levers and linkages whilst making a creepy crawly beetle!

Order Code	Description	Price
75-0705	mBot 6 Leg Add-on	£20.78

Order Code	Description		Price
75-0701	mBot v1.1 2.4GHz		£71.62

mBot Servo Pack

The mBot Servo Add-on pack from Makeblock lets you add extra movement to your latest mBot creation. For example, you could mount the mBot's ultrasonic range finder onto the servo allowing your bot to "scan" its environment. Supplied with 1 x 9g servo

and adaptor, 1 x RGB LED, 2 x brackets, 2 x plates, 4 x cuttable linkages, 4 x brass risers (M4 x 25), plus a spanner, cables, screws and nuts.

Order Code	Description	Price
75-0704	mBot Servo Pack	£20.78

Programming your Makeblock creations

mBloc

Compatibility Windows, Mac

Robot Compatibility Starter Robot, mBot, mBot Ranger, Ultimate 2.0

mBlock is a drag and drop interface based on the ever popular Scratch programming language. It's really easy to learn, very powerful and the chances are, your students have already encountered Scratch.

You can download your programs to your robot via a USB cable, using the 2.4GHz RF adaptor or over Bluetooth if your computer has a compatible Bluetooth interface.

Me Blue LED Matrix 8x16

The Me 8 x 16 LED matrix from Makeblock lets you add bling and character to your latest mBot creation. Attach the matrix to the front of your bot and it can smile, frown and blink. Display numbers and letters or flash patterns, it's up to you. The matrix is compatible with the mBlock software and it has it's own block that lets you create simple animations or text.

Order Code	Description	Price
75-0707	LED Matrix 8x16	£7.98

Please note: Add-On kits requires an mBot 2.4GHz or mBot Bluetooth, sold separately.

£1449.00 Order code 25-0202

The UP BOX+ is the largest of the printers in the UP Range. Boasting an impressive 255x205x205mm build size and high resolution prints, this is the perfect machine for creating bigger models.

As well as having a large capacity, the UP BOX+ also has plenty of features to make it easy to set up and use such as WiFi connectivity, automatic bed levelling and nozzle height detection. The heated bed makes it suitable for both ABS and PLA prints and the fully enclosed housing with HEPA filter gives excellent reliability in all conditions.

Technical Specifications

UP mini 2

£464.99 Order code 25-<u>0055</u>

The UP Mini 2 is the newest addition to the UP family of 3D printers. It takes many of the best features of the original UP Mini, the ever-popular UP Plus 2 and the larger UP BOX and packages them all into a small, neat and portable machine.

The maximum print size stays the same at 120x120x120mm but the resolution has improved from 0.20mm to 0.15mm and the UP Mini 2 has also gained automatic nozzle height calibration and a HEPA filter. It is also the first printer in the UP range to have a touch screen for easy set up and WiFi connectivity allowing you to control your printer over a network or using the iPad app.

The touch screen can be used to control basic functions such as calibration, adding filament, preheating the bed, turning the light on and off and setting up the WiFi. It also gives information during the printing process such as nozzle and bed temperature, progress bar and time to completion for the current print. It also lets you know how many grams of filament are left on the current spool of material.

But perhaps the most surprising thing about the UP Mini 2 is that it does all this for the same price as the original UP Mini.

Technical Specifications	
Machine size	255x365x385mm
Machine weight	8kg
Enclosed build chamber	v
Heated bed	v
Maximum print size	120x120x120mm

VOLTCRAFT DSO-1062D-VGA Digital Oscilloscope, 60MHz with VGA Interface

The Voltcraft DSO-1062D-VGA is an Entry-Level Digital Storage Oscilloscope with a VGA Interface for connection to a large screen or projector if required. This oscilloscope provides two channels with a bandwidth of 60MHz, a real-time sampling rate of 1GSa/s, and a memory depth of 512kpts per channel, which are available when using only one channel to 1Mpts.

The oscilloscope has a large 17.7cm (7 inch) colour display with a resolution of 800 x 480 pixels as well as WINDOWS-style interfaces and menus for easy operation. The oscilloscope provides context-

sensitive, hyperlinks, and an index to enable you to master all operations on the device easily and quickly, improving your efficiency in production and development. It has also a VGA interface for connection to a large screen for classroom demonstration purposes.

What's in the Box?

Voltcraft DSO-1062D-VGA 2 probes (each 1: 1/10: 1) Power cord USB cable Software

Detailed instruction manual (English) Quick Guide (multilingual)

Please Note: The oscilloscope screen is still valid when connection to a large screen is made.

VOLTCRAFT PS-1152A, 22.5W Single Output DC Bench Power Supply

0

At just 16cm wide, the Voltcraft PS-1152A makes an ideal basic space saving bench power supply for lower voltage ranges from 1.5V to 15V.

This electronically regulated

- Overheating protection
- PSU Technology: Linear
- DC bench power supply Manual Power cable not included

The Rapid PS3025 is a new high quality, fully regulated, power supply capable of supplying up to 30V at a maximum of 2.5 amps with additional fixed 5V and 12V outputs at 500mA.

- Voltage and current outputs are individually displayed on liquid
- Output voltage is continuously adjustable via a single control from 0 to 30V DC
- Output current limiting is fully adjustable up to 2.5A, again by a single control
- The 30V output is terminated with 4mm colour coded
- colour coded terminal block

Order code

51-1823

£41.54

- terminals The 5V and 12V outputs are terminated via a spring loaded
- All outputs are overload and short circuit protected

=Rapid Dual Rail 1A Regulated **Power Supply**

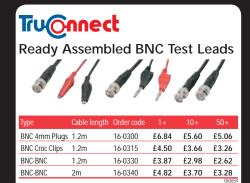

A versatile supply offering a wide range of stabilised DC voltages in both single and dual rail mode. The use of separate 4mm terminals for each of the positive and negative outputs gives the user eleven single rail voltages ranging from 3V to 30V and thirty three dual rail voltages (symmetrical and asymmetrical) in the range 5-0-5V to 15-0-15V.

A maximum of 1A per rail is available All outputs are short circuit protected Dimensions 140 x 125 x 240mm

Servos

is capable of continuous rotation clockwise or anti-clockwise, as opposed to moving to a set position. The servo is ideal for the beginning roboticist and is perfect for use with the Motor Shield for Arduino. The servo can be

controlled using any servo code, hardware or library and to control with an Arduino, just connect the orange control wire to pin 9 or 10 and use the Servo library included with the Arduino IDE. Also available is a wheel (37-1338) that can be attached

directly to the servo. The servo and wheel are also available as a package (**37-1336**).

Good for making simple moving robots

Analog Micro Servo

Continuous Rotation

The FS90R is an analog micro servo that

- Small dimensions means servo can fit in confined spaces
- Lightweight
- Operating voltage 4.8 to 6V
- A 3-pin 10cm cable is available for connecting

SCS15 Smart Control Digital Servo with Metal Gears and Brackets

The SCServo is a multipurpose UART BUS robot servo designed for use with Arduino. The unit can work in both servo mode and wheel mode. The servo mode can be wired together in robots to control limbs and set them at specific angles. The wheel mode is intended for wheel-type operations. The SCServo can give feedback on the values of position, temperature, load, speed and input voltage, as well as having the ability to set parameters such as speed of rotation, max. output torque, operating voltage limit, operating temperature limit, etc.

To connect to Arduino The TTLinker control board is required (available separately as 37-1333). The TTLinker is a signal conversion board. Arduino needs to convert its UART signals to the half duplex type and through TTLinker connect to SCServo. The TTLinker also has more interfaces to make provision for more sensors

When an Arduino is being used to control the SCServo an Arduino library is required.

MODELCRAFT

Micro Servo MC1811

Affordable micro servo from Modelcraft, suitable for use as a replacement servo for ARF models or as part of the standard equipment for the hobby workshop.

Mounting material included

BMS-410C Plastic Gear JR Standard Servo Analogue Servo

The Modelcraft BMS-410C Standard Servo is not only economical, but ideal for many applications in **Radio Control** modelling owing to its **standard dimensions**. It is also compatible with microcontroller systems such as PICAXE, Arduino and Raspberry Pi.

- Standard dimensions
- Includes control horn and screw
- Modelcraft type BMS-410C

Standard Servo RS2 MG/BB with **Ball Bearings and Metal Gears**

The Modelcraft RS2 Servo is ideal for numerous applications in the modelling field, such as radio controlled models like cars, airplanes and robots.

Kingbright

14.2mm High Efficiency Red LED Display Cathode

High efficiency red 14.2mm (0.56in high) seven segment LED display from Kingbright. These well designed components have been categorised for luminous intensity, and use only the best materials with the source colour devices made of gallium phosphide. On top of that, the connectors along top and bottom simplify wiring

in multi-digit applications. The

unique Kingbright LED Display is also economical to use, in the process making it excellent value on the market place.

- Low current operation
- White segments and grey display surface to maximise on/off contrast
- Attractive character appearance
- Easy mounting on PC boards or sockets
- IC compatible
- Common cathode

60/40 Tin/Lead Flux-Cored Solder Wire

A high grade solder wire containing 60% tin and 40% lead, available in a wide variety of diameters and reel sizes.

Rapid 60/40 Tin/Lead Solder Wire provides excellent solder joint reliability, superior joint strength and excellent thermal and mechanical fatigue resistance. It has a rosin-activated flux which requires little cleaning after making the solder joint. It is ideal for use in applications requiring good activation.

- High grade 60/40 tin/lead alloy solder wire
- Melting temperature 190°C

 Recommended minimum bit temperature 300°C
 Rosin activated flux manufactured to JISZ3283 Please note: This product contains lead and rosir

25W iron with 13A plug	85-0640	£13.46	£12.66	£11.13
Spare 25W 230V element	85-0642	£3.36		
Barrel & barrel nut assembly	85-0666	£1.65	£1.27	£1.06

Highly respected by both industrial and education users alike. Antex soldering irons have become one of today's classic soldering tools. It is a tribute to the simple, yet highly effective basic design of the $\ensuremath{\mathsf{XS25W}}$ miniature electric soldering iron that it has changed little over the years.

Supplied complete with 2.3mm bit and mains cable

Air Extraction Unit

This air extraction unit uses a flexi-duct to carry away extracted air, either via a standard domestic vent or simply placed through a partially opened window, making the unit very portable and convenient. The unit can be used in two positions, either upright for 3D items such as models, PCBs, etc. where they can be rested on the surface and where solder fumes and general solvent and gas extraction is performed, or in a reclining position which is designed for accommodating artwork up to A3 size for spray mounting, aerosol lacquers and fixatives, etc.

Filtration is performed by a particulate (intake) filter that is a 3-stage graduated fibre filter that has a high particle holding capacity, giving the filter a long operational life. Extraction is then performed via the 2m x ø100mm flexi-duct. This filtration/extraction process vastly reduces and/or eliminates operator exposure to potentially hazardous substances.

- Steel construction Dove grey finish
- Centrifugal blower
- Replaceable plastic spray/fume shield
- · Can be assembled in seconds
- · Sealed electrical wiring and switch, downstream of filters Brushless motor with external rotor
- UL, VDE and CSA approved

Air Filtration Hoods and Spray Booths

These units have been designed to be used as spray booths in the studio/classroom/workshop to protect operators and maintain environmental cleanliness and are ideal for art, graphics, design technology, crafts, modelling, etc. The spray booths use two filters for effective air filtration. The particulate (intake) filter is a 3-stage graduated fibre filter that has a high particle holding capacity. The second filter is a carbon type filter that assists in the reduction of solvent odours.

Designed to be used in one of two ways. 3D items such as models, PCBs, etc. may be placed onto the hood base for spraying, cleaning, sanding, etc. For artwork applications the hood enclosure will accept standard drawing boards (A2 87-5502, A1 87-5503) which may be placed at an angle for efficient overspray capture.

- Quiet in operation Steel construction
- Dove grev finish
- · Fan/filter unit mounted onto hood enclosure
- Axial fans
- Sealed electrical wiring and switch, downstream of filters
- · Brushless motor with external rotor • UL, VDE and CSA approved

Air Extraction Spray Booths

These air extraction units are ideally suited to use as spray booths for a wide variety of applications in the studio, classroom or workshop. There is a choice of air volume capacities to cater for application and useage and all odours and gases exrtacted are vented to atmosphere via flexi-duct so that the working environment can be kept free of contaminants. The design of the units mean that they are suitable for use with objects such as: prototypes, models, ceramic parts, PCBs, etc. Drawing boards, either A2 (87-5505) or A2 and A1 (87-5506), can be accomodated, being put in at an angle for efficient overspray capture.

Air extraction is carried out by centrifugal blowers via a three stage graduated fibre particulate filter that has a high particle holding capacity, ensuring long filter life. The filtered air is exhausted via flexi-ducts (1x for 87-5505 and 2x for 87-5506) which may be either fixed to a standard domestic vent or placed through any convenient window. This dual process of extraction and filtration greatly reduces or eliminates operator exposure to contaminants and harmful airborne substances.

- Steel construction
- · Dove grey finish

- Centrifugal blower (2x for 87-5506) Sealed electrical wiring and switch, downstream of filters
- Particulate filter
- Carry handle
- Brushless motor with external rotor
 UL, VDE and CSA approved

Fume Extraction Hoods and Cabinets

These fume filtration hoods are intended for use where external venting is required. The attached flexi-duct vents to atmosphere, either through a standard domestic vent or a convenient window. Filtration is carried out by a 3-stage graduated fibre filter with a high dust holding capacity that ensures a long filter life. This dual process of filtration and extraction means that operators and environments are protected from exposure to potentially hazardous substances

The units may be used both for 3D items such as PCBs, models, etc. and 2D artwork, the units accepting standard drawing boards (A2 87-5519, A1 87-5520). A clear polycarbonate panel is mounted on the hood and hood lighting is also included. The whole unit can be assembled in seconds and may be placed on a desk, bench or trolley. Ideal for use in the workshop, dental/medical labs, design technology classroom, pharmaceutical lab, etc.

- TechFlo fume cabinets of 355 or 710m³/hr capacity
- Capture, contain, filter and expel for a cleaner, safer working environment
- Extraction cabinets vent to atmosphere via flexi-duct of 2m x ø100mm
- 87-5520 has two flexi-duct vents
- Three-stage particulate filter
- · Can accomodate standard drawing boards

- Clear polycarbonate panel for protection
- Hood lighting Steel construction with dove grav finish
- · Sealed electrical wiring and switch, downstream of filters
- UL, VDE and CSA approved
- Desk/Bench Top Fume Cabinets

These fume cabinets are for use in situations where external venting is impractical but where there is a need for contaminant capture and air filtration. Especially suitable for use in dental labs, for electronic design and rework, pharmaceutical labs, design technology, science and other industrial and educational uses. Applications for which the fume cabinets are ideal include: filtration of fumes and capture of contaminant particles from monomers, adhesives, hazardous powders/particulates, conformal coatings, resins, sealants, solders, light grinding particles and dust, organic solvents, etc.

In operation the fume cabinet has two stages of filtration. The particulate (intake) filter is a 3-stage graduated fibre filter that has a high dust holding capacity, prolonging its life. The second stage of filtration is by by a high grade bonded carbon filter (3.5kg 87-5513, 7kg 87-5514). The high performance of the fume cabinet is aided by a folding clear plastic fume shield that can be removed and stored if not required, reducing the footprint of the unit.

- Steel fan/filter casing
- Dove grey finish · Folding clear PETG plastic fume shield
- Particulate filter
- 87-5514 has dual airspeed function to facilitate higher vapour absorbtion UL, VDE and CSA approved Carry handle
- Can be assembled in seconds
- Centrifugal blower · Sealed electrical wiring and switch, downstream of filters
- Brushless motor with external rotor

Virtuoso A4 and A3 Sublimation Printing Starter Kits

These Mega Virtuoso A4 and A3 Sublimation Printing Starter Kits provide an easy and cost-saving way to help you get started with sublimation printing. They each include a Virtuoso printer, heat press, ink cartridges, sublimation paper and heat resistant tape, to get you up and running as soon as possible.

- Each kit contains 2 x packs of sublimation paper and 2 rolls of Heat Tape
- The A3 kit also contains a Sublimation Materials Starter Pack
- Please see the individual product entries for full details

A4 and A3 RICOH Sublimation Special Paper – Packs of 200

This slow-drying, high ink-release paper is excellent for use with soft plastics, because the paper doesn't stick to the printed product. This high quality sublimation paper has been specially formulated for use with Ricoh printers.

- Suitable for use with a wide range of materials including soft plastics
- Print on the coated side without
- the watermarks
- Available in A4 and A3 sizes • Supplied in packs of 200

Because the ink is slow drying, it should be left before heat pressing. Designs with large areas of black are sometimes difficult to achieve.

Digi Coat Coatings and Promotor for Sublimation Printing

This range of coatings allow you to prepare your own items and materials for best results with sublimation printing. To accept a sublimation transfer print, most products must first be given a coating of polymer for the sublimation inks to adhere to

- Range includes:
- Clear coat for most common materials
- Opaque coat for dark or black materials

Heat-Resistant Tape 10mm x 16m for Sublimation Printing

Heat-resistant tape, ideal for securing sublimation printed artwork during the heating process.

• Width 10mm Supplied on 16m rolls

Cast Acrylic Solid Colour Sheets

These cast acrylic sheets from Perspex[®] are available in a choice of sizes and in a range of vibrant, **bright colours**. These coloured sheets will make any project get noticed – whether it's a sleek storage unit, a specialist point of sale display or a new corporate identity. With excellent resistance to outdoor weathering, unsurpassed batch-to-batch colour consistency and excellent environmental credentials, Perspex® Solid colours will help you bring your creative ideas to life.

Other colours available from Rapid on request

Cast Acrylic Clear Sheets

These clear cast acrylic sheets from Perspex® transmit 92% of all visible light - that's better even than glass. Add to this excellent resistance to outdoor weathering, high tensile strength and rigidity, light weight and resistance to impact and it is easy to see why **Perspex® Clear** sheets are ideal for applications requiring critical visual performance and durability. Available in a range of sizes and thicknesses.

- High gloss, hard surface
- Easy to clean Long service life
- Safety glazing material meeting the requirements of ANSI Z.97 and BS 6262 Easy to thermoform with low-cost tooling

- Technical specification
- 457 x 254mm sheets are suitable for: Clarke's 725 and 917, SATRO 330 and 329 457 x 305mm sheets are suitable for: Formec 300X, Clarke's 1210 (2 sheets)

RVFM Corriflute Corrugated Plastic Board

Polypropylene corrugated board is often referred to by the trade name Correx. It is a lightweight, tough material, which is easy to cut using a craft knife. The material can be joined using a wide variety of techniques, from gluing and stitching, through to fastening with click rivets or Corri-Joiners (see order code 37-3320).

- · Sheets have large internal channels offering good rigidity
- Sheets are 605 x 605 x 4mm
- Pack contains 4 each of Blue, Black, Green, Red and Yellow
- Supplied in an assorted coloured multi-pack of 20 sheets

MAGMA **Cyanoacrylate Superglue** Gel Adhesive MagmaBond Cvanoacrvlate Superglue Gel Adhesive is a fast curing, very high viscosity Ethyl Cvanoacrylate-based adhesive The gel formulation is suitable for bonding poorly GM/ mating components and for porous substrates such as china and other ceramics. It is also suitable for use on vertical and over-head surfaces as it will not drip or slump. • High viscosity, gel superglue adhesive Fast curing
Bonds most metals, wood, card, plastics, 30 rubbers, leather, fabrics and other 3g Order code common materials Suitable for bonding poorly mating 87-8018 components and for porous materials like china and other ceramics F1.43 Suitable for use on vertical and over-head surfaces Does not drip or slump Supplied in 3g tubes Technical specification Viscosity Gap Fill Temperature Range Cured strength 50,000 to 90,000cps 0.5mm -50 to +80 °C 15 to 27N/mm Description 15 to 27N/mm² Gel superglue rolson Precision Super Glue Superglue in a convenient tube with a precision applicator and anti-clog nozzle. Perfect for bonding metal, wood, many plastics, ceramics, rubber, leather and much more. 86.9709 Precision applicator E1.05 Drop control Self-piercing, anti-clog cap Supplied in a pack of 3x 3g tubes
Includes instructions including precautionary notes and warnings Rolson type 60380

The MagmaBond Rapid Epoxy Resin Twin Syringe contains 12ml each of resin and hardener and dispenses equal amounts of each for perfect mixing.

- 2-part epoxy resin syringe
- Produces a strong bond in seconds
- Sets in 5 minutes
- · Ideal for use with ceramics, wood, chipboard,
- glass, metal, stone and most hard plastics Temperature range -40 to +100°C
- Supplied in a 25ml twin syringer

Ч HAL Anaerobic Nutlock

MagmaBond Anaerobic Nutlock is a general-purpose, medium strength, thixotropic nutlock designed for use where threaded and push-fit parts must remain secure in normal use, but can be disassembled with hand

tools when servicing is required. MagmaBond Anaerobic Nutlock is a blue liquid that cures when confined in the absence of air, e.g. on close-fitting metal

surfaces and is suitable for all metric and imperial nuts and bolts, preventing vibration loosening, and leakage through the thread

The thixotropic nature of MagmaBond Nutlock prevents run off, dripping and migration after assembly. Once applied, parts slip ogether easily, lubricated by the adhesive.

- General-purpose, medium strength, thixotropic nutlock Can be disassembled with hand tools when servicing is required
- Suitable for all metric and imperial nuts and bolts
- Prevents vibration loosening, and leakage through threads Thixotropic nature prevents run off, dripping and migration

after assembly Parts slip together easily, lubricated by the adhesive Available in **10 and 50ml bottles**

AM Radio Project Classpack

This excellent projects package contains a wide range of components for schools working on radio type projects. Linked to the National Curriculum, this **classpack of 20** projects offers a substantial saving on parts bought separately which is ideal for schools working to tight budgets. The kit is supplied in a strong box with lid.

- Dimensions of the box: 43cm x 31cm x 7cm
- Great school resource • Suitable for Key Stages 3 & 4 (ages 11 to 16)
- Supplied as a pack of 20 kits

Fach kit requires 1x AA battery (not included)

555 Timer Project Classpack

Your chance to buy a classpack of 20 Timer Project kits offering a substantial saving. Linked to the National Curriculum and supplied in a handy storage tray, complete with lid.

- Great school resource
- Suitable for Key Stage 3 (ages 11 to 14)
- Supplied as a pack of 20 kits
- Each kit requires 1x PP3 battery (not included).

Each student will also require: 4 x M3 6mm pan head slotted screws (available as Rapid part 33-1500), 4 x M3 12mm pan head slotted screws (33-1510), 4 x M3 spacer 4mm (33-3632) and 4 x 18mm threaded spacers (33-3535).

Moisture Tester Project Classpack

A classpack of 20 kits of components to build a functional Moisture Tester that can tell if pot plants require water. The classpack contains all the electronic components required, including ready-made PCBs, in a Gratnell's Tray with lid. It offers a substantial saving compared to parts bought separately.

Students will love this Moisture Tester Project, which is linked to the National Curriculum, as it is simple to assemble and is ideal as an introduction to electronics.

- Dimensions of the box: 43cm x 31cm x 7cm
- Great school resource
- Suitable for Key Stages 2 & 3 (ages 7 to 14)
- · Supplied as a pack of 20 kits
- Each kit requires 1x PP3 battery (not included).

Audio Amplifier Project Classpack

Aimed at Key Stage 3, the audio amplifier project provides teachers with a stimulating and inexpensive project through which to study the subject of amplification.

This schools projects package contains a comprehensive selection of components for schools working on audio related projects linked to the National Curriculum, this classpack of 20 projects offers a worthwhile saving on parts bought separately which is ideal for schools working to tight budgets

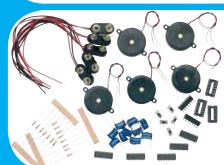

Teaching material available for free download at www.rapidonline.com

Each kit requires 1x PP3 battery (not included).

Mini-light Project Classpack

This simple but interesting project has been designed by Rapid's technical team for Key Stages 1, 2 & 3 students. It will help them to make a fully working Red LED mini-light from the parts supplied in this great kit. The classpack is supplied in a handy storage tray with lid, containing sufficient components for 20 mini-lights.

- Batteries and LEDs
- Plastazote foam core
- High impact polystyrene outer layers
- Standard Mini-light is a keyring torch kit using a red LED
- Suitable for Key Stages 1, 2 & 3 (ages 5 to 14)
- Supplied in classpacks of 20

Logic Alarm Project Kit

This project is designed to cover key topics in electronic based exam courses at GCSE level.

- · Each unit of work will offer students an opportunity to build a fundamental circuit and incorporate this with their own design
- The component kits are supplied in multiples of five and include:
- ICs and switches
- Resistors and capacitors Piezo sounders and battery clips
- Pre-drilled PCBs are available separately in packs of 5, order code 70-0085
- Suitable for Key Stages 3 & 4 (ages 11 to 16)
- Requires 1x PP3 battery (not included).

Mini-light Kits are available - visit
