step-by-step project

Notes

Step 7

To attach the head to the body, cut a piece of pipe cleaner approx. 4cm long and push gently into the top of the larger egg shape, near the front. Leave about half of the pipe cleaner sticking out, gently push the head onto the remaining pipe cleaner.

Step 8

From the bag of feathers, pick 4 larger coloured feathers and 1 smaller feather. Stick 2 of the larger feathers on each side of the bird and the smaller feather on the back of his head using Pritt Stick.
