Our specially designed acrylic case offers a perfect solution for users who want to use the original Raspberry 7-inch display in combination with the new Raspberry Pi 5. This bespoke case allows you to create your own customized Tablet PC with ease. It has been specially designed to fit both the display and the Raspberry Pi 5 snugly and securely.

The design of the case ensures that all ports of the Raspberry Pi 5 remain freely accessible so that you can enjoy maximum functionality without compromise. The well thought-out design not only provides space for your hardware, but also optimally protects it from physical damage. An additional highlight is the built-in fan, which ensures efficient cooling and thus increases the performance and longevity of your Raspberry Pi 5.
