Primary-switched bus power supply, STEP POWER, Lever Push-in connection, DIN rail or direct mounting, input: 1-phase, output: 30 V DC / 640 mA

Product description

The KNX bus power supply of the STEP POWER family is tailored ideally to modern building automation. As the first bus power supply, it has an active KNX filter circuit. This adapts dynamically to the connected KNX devices, increasing the efficiency of the bus system. The multifunctional color display shows all relevant KNX status information at a glance, such as the current bus load or historical values as a diagnostic tool in the menu. Thanks to the wide input voltage range of 85 V AC to 264 V AC and 90 V DC to 275 V DC, the KNX bus power supply can be used worldwide. The integrated Push-in lever connections complete the handling of the STEP POWER bus power supply.

Your advantages

- Easy analysis, thanks to integrated color display - all relevant KNX status information at a glance
- History can be called up as diagnostic values in the menu
- Unique dynamic KNX choke circuit for greater efficiency
- Space-saving, thanks to the compact design
- Worldwide use, thanks to AC and DC wide range input
