

Product Change Notification

Topic	Fuse Replacement Triggered by Sudden Supplier EOL and Safety Certification Renewal
Series	TMPS 03, TMPS 05
Reason of Change	The reason for this PCN is the renewal of the safety certifications due to the fuse not being included in the critical component list. The original fuse was subject to a sudden End-of-Life (EOL) notice by the supplier, and to maintain regulatory compliance and ensure uninterrupted supply, a replacement fuse was adopted. In addition, to mitigate future supply risks, the new safety reports will include multiple approved backup components to ensure supply continuity and avoid emergency changes.
Timeline	The product change is active for all models since production date 2523
Acknowledgment	This PCN is considered to be approved 30 days after the above given date. Any concerns shall be provided within the acknowledgment period.
Type of Change	<input checked="" type="checkbox"/> Major <input type="checkbox"/> Minor

Description of Change

All electrical specifications and performance parameters, including efficiency, output voltage accuracy, input variation, ripple & noise, overload protection, switching frequency, transient response, and others, have been verified to meet requirements.
