

## RJ45 PortBlocker in red and white

### **RJ45 PortBlocker in red (XPBR) and white (XPBW)**

**TUK** have tackled the security risks of open ports with the PortBlocker, a patented solution that secures from unauthorized port access and security breaches

#### ***Features***

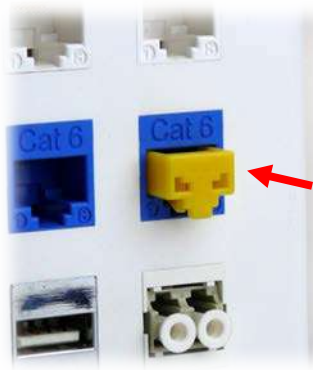

- Two unique and proprietary locks and keys for unparalleled security; foregoing the conventional industry design of a "one size (or key) fits all."
- Universal – fits all standard RJ45 (8p8c) sockets
- Compact Design is suitable for all-density applications
- Tamper Resistant Design secures against unauthorized port access
- Easy-ID: Available in two bright colours for easy identification, designating or reserving
- Installs fully recessed for decreased accessibility as an added deterrent (varies according to socket manufacturer)

#### ***Specifications***

- Colour: Red, White
- Material: Polycarbonate

# PortBlocker (all colours) Application Instruction

## 1.) To install PortBlocker

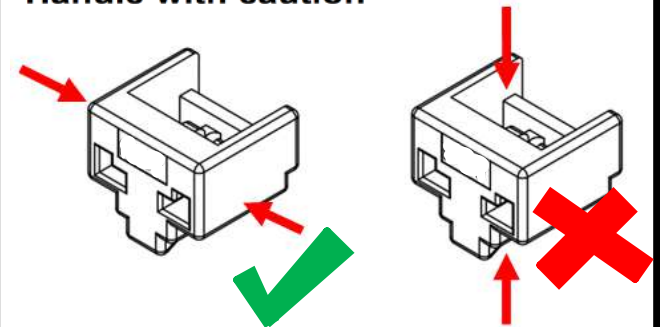

*Simply place PortBlocker into the desired RJ45 port and push in. (Tool not required)*

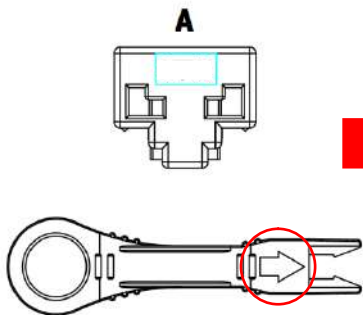

*PortBlocker in locked position.*

**Handle with caution**

*When handling PortBlocker, hold it firmly from the side and avoid holding from top and bottom.*

## 2.) To remove PortBlocker

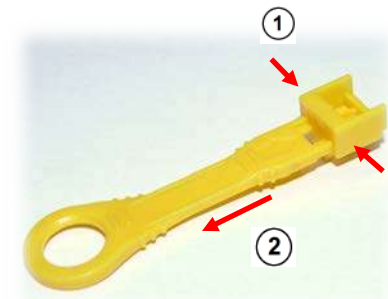

*Choose the matching colour PortBlocker removal tool*

*Ensure removal tool is straight i.e. while inserting tool make sure the arrow sign of the tool is facing position A*

*Simply pull out the removal tool to remove the PortBlocker.*

*After Removing PortBlocker, gently press on the side of the PortBlocker and pull back the removal tool.*
