

Springs Large - Compression

LabValue - Springs Large - Compression

- » Approximate free length: 300 mm.
- » Outer diameter: ~10 mm.
- » Wire gauge: 19 SWG.
- » Designed for demonstrating the behavior of compression springs (e.g., in physics/education setups) including concepts like Hooke's Law.
- » Simple specification—ideal for visualisation in design/spec sheets for educational/lab-use.
