

Bits for Phillips Screws

EAN/GTIN:	4013288111005	Dimension:	25x7x7 mm
Part no.:	05071012001	Weight:	5 g
Article no.:	3851/1 TS PH	Country of origin:	CZ
		Customs tariff number:	82079030

- Solution to the extraneous rust problem: fasten stainless screws with stainless tools
- For Phillips screws
- Torsion design against premature wear
- 1/4" hexagon drive (Wera connecting series 1)
- "Take it easy" Tool Finder: colour coding according to profile and size

High quality bits out of stainless steel for cross-recess screws. Wera stainless are made out of stainless steel which prevents the formation of unsightly extraneous rust. Come with Torsion zone: Torsion bits take-up torque peaks and absorb them in the Torsion zone. This prevents premature wear and extends the service life of the bit. 1/4" hexagon, suitable for holders as per DIN ISO 1173-D 6.3.

Bits for Phillips Screws

Extraneous rust

Stainless steel has the property of not rusting. However, if tools made out of conventional steel are used for stainless steel components or screws, the particles left behind from these tools can adhere to the surface and then rust. This effect – known as extraneous rust – can impair the visual appearance and even cause structural damage that may result in expensive repair work. The wear particles that cause this rust effect can be prevented by using stainless steel tools.

Stainless Steel Bits

Wera stainless steel bits are manufactured out of stainless steel so unsightly rust can be avoided. The stainless steel bits from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

Screw stainless steel together with stainless steel!

Solution to the rust problem: screw stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

Vacuum ice-hardened

The stainless steel tools from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

“Take it easy” tool finder

“Take it easy” tool finder with colour coding according to profiles and size stamp – for simple and rapid accessing of the required tool.
