

**EAN/GTIN:** 4013288134493  
**Part no.:** 05017040001  
**Article no.:** 917 SPHS

**Dimension:** 188x33x33 mm  
**Weight:** 91 g  
**Country of origin:** CZ  
**Customs tariff number:** 82054000

- Chiseldriver for fastening, chiselling and loosening
- Multi-component Kraftform handle for fast and ergonomic screwdriving
- Smooth hard zones for high speed turning, soft grip zones for high torque transfer
- Hexagonal blade extending through the handle, impact cap with integrated square and bolster
- The Wera Black Point tip offers an exact fit and optimum corrosion protection

Wera Chiseldriver for fastening, chiselling and loosening seized screws. Multi-component Kraftform handle for fast and low-fatigue working. Kraftform Plus: hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. A hexagon blade out of high quality bit material that extends right through the handle ensures full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking. Comes with an impact cap for durability and reduced risk of splintering. The square take-up in the impact cap enables higher torque transfer when screwdriving with the T-handle, Zyklop ratchet or Mini ratchet. The Wera Black Point tip and a complex hardening process ensure a long service life of the tip, enhanced corrosion protection and an exact fit. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace and handle markings make for simplified finding and sorting of the tool.

**Integrated impact cap**

Screwdrivers are often misused as chisels. This can be dangerous. The chiseldriver is the solution when not only screwdriving is required. For fastening, chiselling and loosening seized screws. Wera chiseldriver: the screwdriver whenever the going gets tough!

An integrated impact cap lengthens the service life and reduces the danger of splintering. Nevertheless, always wear protective goggles.

**Impact cap with integrated square socket**

Even higher torque can be transferred by connecting the square drive version to a T-handle or Zyklop ratchet.

**Pound-thru blade**

A hexagon blade made out of high-quality bit material extends right through the handle – thereby ensuring full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking.

**Integrated hex bolster**

Greater torque can be transferred by fitting an open-jaw or ring spanner over the integrated hex bolster.

**Wera Black Point tip**

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.

**Prevents hand injuries**

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

**Non-roll feature**

The hexagonal non-roll feature prevents any rolling away at the workplace.
