Bit-Checks / Bit-Safes Universal

EAN/GTIN: 4013288033802 Dimension: 97x65x15 mm

Part no.: 05056164001 Weight: 92 g Article no.: Bit-Check 10 TX Universal CZ

Country of origin:

Customs tariff 82079030

number:

• Upright positionable Bit-Checks convince due to their functionality in a minimum of space

- Universal holder with quick-release chuck for rapid bit change
- Torsion design against premature wear
- Tough viscous bits for universal use
- In handy and robust Bit-Check

Robust Bit-Check by Wera. Bit-Checks provide a quick overview of the tools available. Bits not needed are simply reinserted into the set and do not get lost. Simple transportation e.g. in the shirt pocket. Includes universal holder with quick-release chuck. For the take-up of bits with 1/4" hexagon head drive as per DIN ISO 1173-C 6.3. Can be inserted in the power screwdriver or for use in the chuck of the electric drill. Comes with tough viscous TORX bits for universal use.

Bit-Check 10 TX Universal 1, 10 pieces

05066313001	1 x TX 27x25
05066315001	1 x TX 30x25
05066320001	1 x TX 40x25

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

TZ-Bits

TZ-Bits are tough bits with a torsion zone. Torsion bits absorb the damaging peak torque loads in the torsion zone. This prevents premature wear and enhances the service life of the bits.

Universal holder with quickrelease chuck

For a firm, wobble-free connection between holder and bit with quick-release action. Simply push sleeve forward to change bits. The non-magnetic version prevents any unwanted attraction of metal fillings.

Bit Ranges

We have had bit ranges in our programme for many years now. In 2016, we put a question mark against everything and came up with a game changer. We wanted bit ranges with bits whose profiles and sizes could be more easily recognised. We wanted bit ranges that were as compact as possible and which were Wera-like at a first glance. We wanted bit ranges with bits that could be removed and reinserted more easily. We wanted bit ranges with as little weight as possible. The new multicomponent Bit-Checks satisfy these requirements; the soft material in the lower section of the Bit-Checks ensures that the bits are firmly held yet easy to remove.
