

Bit-Check 6 PH Impaktor 1, 6 pieces

Bit-Checks Impaktor

EAN/GTIN:	4013288157713	Dimension:	72x65x12 mm
Part no.:	05057691001	Weight:	70 g
Article no.:	Bit-Check 6 PH Impaktor 1	Country of origin:	CZ
		Customs tariff number:	82079030

- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- "Take it easy" Tool Finder: colour coding according to profile and size

6 Wera Impaktor bits tidily arranged in a minimum of space in a practical Bit-Check. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry. The bit tip is coated with tiny diamond particles; this reduces the risk of any slipping out of the screw head thanks to the enhanced frictional resistance.

Bit-Check 6 PH Impaktor 1, 6 pieces

Bit-Checks Impaktor

Content:

851/4 IMP DC

05057656001 4 x PH 2x50

05057657001 2 x PH 3x50

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Above-average service life

Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

Bit-Check 6 PH Impaktor 1, 6 pieces

Bit-Checks Impaktor

Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit result in the so-called TriTorsion system.

Impaktor system

Wera's Impaktor system consisting of Impaktor bits and Impaktor holders is today's necessary addition to the BiTorsion system with the creation of the TriTorsion system.

Take it easy tool finder system

The "Take it easy" Bit-Checks have bits with a sleeve which – from its colour (e.g. red = Phillips) and size designation – make it simple to access the right bit quickly.
