

**EAN/GTIN:** 4013288134462  
**Part no.:** 05018301001  
**Article no.:** 932 AS

**Dimension:** 218x37x37 mm  
**Weight:** 126 g  
**Country of origin:** CZ  
**Customs tariff number:** 82054000

- Chiseldriver for fastening, chiselling and loosening
- Smooth hard zones for high speed turning, soft grip zones for high torque transfer
- Multi-component Kraftform handle for fast and ergonomic screwdriving
- Hexagonal blade extending through the handle, impact cap with integrated square and bolster
- The Wera Black Point tip offers an exact fit and optimum corrosion protection

Wera Chiseldriver for fastening, chiselling and loosening seized screws. Multi-component Kraftform handle for fast and low-fatigue working. A hexagon blade out of high quality bit material that extends right through the handle ensures full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking. Comes with an impact cap for enhanced service life and reduced risk of splintering. More torque can be transferred with the help of an open-end or ring spanner applied to the integrated hexagonal bolster. The square take-up in the impact cap enables higher torque transfer when screwdriving with the T-handle, Zyklus ratchet or Mini ratchet. The Wera Black Point tip and a complex hardening process ensure a long service life of the tip, enhanced corrosion protection and an exact fit. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace and handle markings make for simplified finding and sorting of the tool.

**Integrated impact cap**

Screwdrivers are often misused as chisels. This can be dangerous. The chiseldriver is the solution when not only screwdriving is required. For fastening, chiselling and loosening seized screws. Wera chiseldriver: the screwdriver whenever the going gets tough!

An integrated impact cap lengthens the service life and reduces the danger of splintering. Nevertheless, always wear protective goggles.

**Impact cap with integrated square socket**

Even higher torque can be transferred by connecting the square drive version to a T-handle or Zyklop ratchet.

**Pound-thru blade**

A hexagon blade made out of high-quality bit material extends right through the handle – thereby ensuring full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking.

**Integrated hex bolster**

Greater torque can be transferred by fitting an open-jaw or ring spanner over the integrated hex bolster.

**Wera Black Point tip**

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.

**Prevents hand injuries**

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

**Non-roll feature**

The hexagonal non-roll feature prevents any rolling away at the workplace.
