

### Cable Ties inside serrated with one-hand release mechanism

#### • REZ-Series

#### Features and Benefits

The unique, patented head design enables quick and simple use. The tie can be inserted in the normal way and pulled tight or the tail can be twisted into the open part of the head and locked into place. The quick-release mechanism can be released by one hand - even when the tie is under tension - by simply pinching the ears.

#### Application

These releasable and reusable ties are ideal for temporary installations or the addition and/or removal of cables. Suitable for a multitude of uses, such as the packaging industry as a bag closure where access to part of the bag contents may be needed but the bag needs to be re-sealed (example - milk powder in the catering industry).

The REZ ties have a one-hand, simple, release mechanism.
