

Rapid Part Number: **56-9951**  
 Europa Part Number: **RAD226B**  
 Specifications and dimensions

- 22mm LED pilot lamp
- Low maintenance due to long life and high reliability
- Last 500 times as long as incandescent lamp

| Features                                      |                         |
|---|-------------------------|
| Colour  | Blue                    |
| Voltage                                       | 24V AC                  |
| Other Colours Available                       | Green, White, Red, Blue |
| Other Voltages available                      | 110 AC/DC, 230V AC      |
| Lamp Head Diameter                            | 29mm                    |
| Depth behind panel                            | 50mm                    |
| Depth in front of panel                       | 14mm                    |
| Number of chips                               | 8                       |
| Wavelength green (gallium phosphide)          | 5600Å                   |
| Wavelength amber (gallium arsenide phosphide) | 6300Å                   |
| Wavelength red (gallium arsenide phosphide)   | 6600Å                   |
| Current rating                                | 20mA                    |
| Degree of protection                          | IP65                    |
| Operating temperature                         | -25°C to +55°C          |
| Life expectancy                               | 30000 hours             |
| Related products                              |                         |
| Plastic enclosure                             | EP-FAA                  |
| Legend plate                                  | RB2-PY                  |
