Notes

Item description: Assembly of female connectors without loss of poles, allowing different functions to be divided within one male header Coding pins inserted into the header interface prevent mismatching, allowing subsequent coding in panel feedthrough applications The female connector is fully shrouded by the male header's housing, providing vibration resistance up to 20 g Safety information 1: The picoMAX® pluggable connection system is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.
