

Base PR

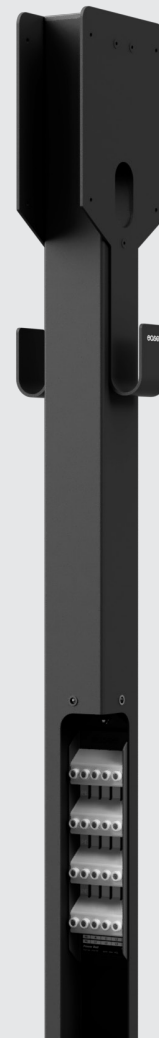

1-2 & 4 Way

Easee Base PR is a sturdy and weatherproof post designed for use in various types of installations. It is easy to connect the poles in series with the supplied connection box "Easee Power Rail", and all mounted charging robots can be easily terminated in the same rail.

When mounting up to two charging robots, the pole has an integrated cable hook which makes it possible to have the charging cable permanently connected¹. This will prevent the cable from lying on the ground.

It is also possible to mount a total of 4 charging robots on this post and thereby get the maximum out of the installation.

¹ The charging cable can be permanently locked in the charging robot.

Measurement
in mm

Specifications

Post configurations

1-Way, 2-Way and 4-Way
Power Rail is optional

Material and finish

Stainless steel with black powder coating

Weight

10-11 kg

Assembly

Adapter plate for lamp posts foundation
Direct mounting to the pillar base
45 degree rotation interval (using the adapter plate)

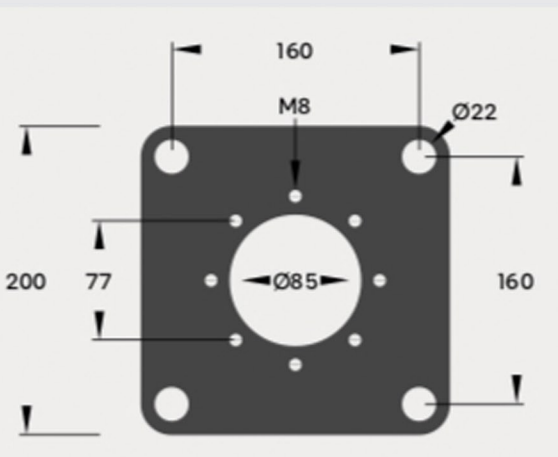

Electrical connection

Connection via Easee Power Rail
Possibility of serial connection of the posts

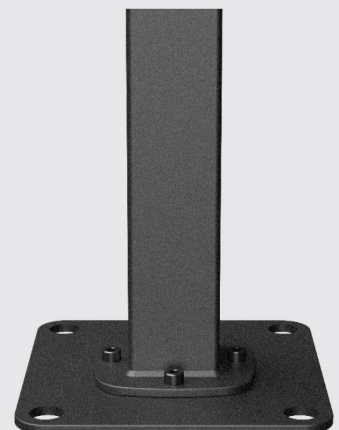

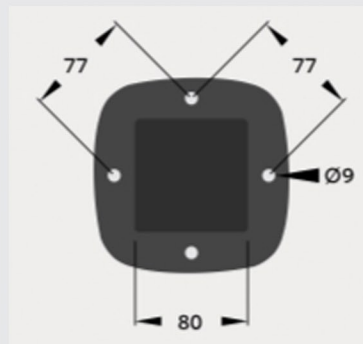

Cable size

In and out of the post: Max 25mm² Cu/Alu
Up to the Charging robots : 6mm² Cu

Adapter plate

Post base plate

* The post is delivered without the Easee charging robot.
