

EV Tower

Future-proofing your EV installations with an award-winning multiplate design.

Supplied with stainless steel fixings, the EV Tower is suitable for all applications and easy to assemble, including an interchangeable plate to accommodate any EV charger available in the market.

Produced for durability, each pole is weather resistant and built to last, coming with a 3-year warranty as standard.

Compatible with Pod-Point, Zappi, Wallbox and Rolec, making it your all-in-one charge master. Just one pole is able to serve numerous chargers.

EV Block Mini

EV Block Mini - Specifically designed for the EV Tower for domestic and light commercial installations.
