

Arduino MKR Proto Large Shield Prototyping Board for MKR Boards

TSX00002

Need more room to develop your MKR projects?

The MKR Proto Large Shield fits onto your MKR board using its provided female/male headers and enables you to fix it wherever you want with the mounting holes. This shield features a larger prototyping area with more than 300 solder points and makes connecting components to your board super simple, thanks to the silk that indicates the MKR board pins location.
