

160 iSS/7 screwdriver set Kraftform Plus Series 100. With reduced blade diameter and smaller handle diameters, 7 pieces
Kraftform Plus – Series 100 VDE

EAN/GTIN:	4013288178640	Dimension:	230x115x35 mm
Part no.:	05135961001	Weight:	432 g
Article no.:	160 iSS/7	Country of origin:	CZ
		Customs tariff number:	82054000

- Kraftform screwdrivers with reduced blade diameter as well as partially with slim handle design
- Allows screwdriving even in confined situations
- Kraftform handle for fast and ergonomic screwdriving
- Low-lying screw and spring elements can be reached and actuated
- Safe work at a voltage of 1,000 volts, individually tested

7 Wera VDE iSS screwdrivers with reduced shaft diameter as well as partially slimmer handle design to enable work in confined working situations and to allow low-lying screw and spring elements to be reached and actuated; individually tested tools as per IEC 60900; individual testing in a water bath at 10,000 volts so as to ensure safe working at the permitted voltage of 1,000 volts. "Take it easy" Tool Finder: colour coding according to profile and size. The anti-roll feature prevents any bothersome rolling away at the workplace.

The super slim VDE screwdrivers

The super slim VDE screwdrivers for installation jobs in particularly confined spaces. Not only do the blades have a reduced diameter, the handles also have a very slim design.

VDE-insulated screwdriver with reduced blade diameter

Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.

Individually tested

Our screwdrivers are tested for dielectric strength under a 10,000 volt load to make sure that their most important property, their insulation, has been exhaustively tested. Each individual Wera VDE screwdriver is subjected to this test to guarantee safe working up to 1,000 volts.

Impact strength test

Impact strength tested at -40°C , guaranteeing safety even under extreme conditions.

Multicomponent Kraftform handle

Wera produces the Kraftform handle out of several materials with different properties. A resistant plastic is used for the core which ensures that the blade is held securely even under high strain. A softer material is used for the coloured soft zones, which provides high frictional resistance and allows the transfer of high forces – resulting in less required screwdriving effort. The red sections with their hard surfaces prevent any “sticking” of the hand to the handle, making rapid repositioning of the hand possible.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

“Take it easy” Toolfinder

Screwdrivers with “Take it easy” tool finder: colour coding according to profile and size stamp.

Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.
