

EAN/GTIN:	4013288191014	Dimension:	125x105x35 mm
Part no.:	05003375001	Weight:	223 g
Article no.:	8767 A HF 1	Country of origin:	CZ
		Customs tariff number:	82079030

- Compact textile box with high robustness, low weight and volume
- Bit socket (non-impact) for manual or power tool operations
- The holding function holds screws securely on the tool
- "Take it easy" Tool Finder with colour coding according to sizes
- Knurling on lower socket end for more grip when used manually

Bit socket set TORX®, with holding function for especially convenient screwdriving and a reduced risk of losing the screw when approaching the workpiece.

Zyklop Accessories

We did not just want our creativity to end with the ratchets themselves so we also occupied ourselves intensively with ratchet accessories. That is why our users are now provided with an extension with freely spinning sleeve and flexible lock to enable more secure and more rapid screwdriving. The sockets have been completely redesigned: we wanted to spare the user the need of having two different series – one for manual and the other for power tool applications. And: we wanted to enormous simplify the task of finding the right sizes. Technically, our own ambitious goals represented a real challenge: to endow sockets with the advantage of the holding function on screwdrivers and bits. We succeeded in this!

Bit sockets with holding function for TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool!

Take it easy tool finder system

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).

Secure hold and easy removal

Manual and machine sockets

The all new smooth turning mechanism guarantees both secure and rattle-free storage, yet allows easy removal of the tool.

The manual and machine sockets can be used both for hand and power tools use (non-impact). Users need just one socket set for all applications.
