🇬🇧 Battery replacement:

- ① Unscrew the tail cap.
- ② Insert the battery with the positive terminal towards the head.
- ③ Replace the tail cap and tighten fully.
- ④ Press the tail cap push button to test.

Flashlight Maintenance:

- Use a small brush or blow dry air to clean the dust inside the reflector.
- To remove any fingerprints on the lens, use gentle camera lens cleaner and cotton swab, rub gently.
- To prevent the O-ring from drying and threads operating smoothly, please apply petroleum jelly to these surfaces two or three times a year.
- The O-ring prevents water from getting into the flashlight.
- Do not use flashlight for diving, it is not suitable for high pressure under water environment.
- If water gets inside the flashlight, remove the battery immediately and dry, or put the battery in an area with good ventilation.
- The non-anodized metal groove between the tail cap and the barrel must be cleaned periodically to ensure a good electrical contact. Always keep the tail cap spring clean.

Warning:

Reverse polarity may damage the battery and charger. Lithium batteries can explode or cause burns if disassembled, short circuited or exposed to fire or high temperature. Do not expose the contents to water, mix with used or other types of batteries.

WARNING UV LIGHT. DO NOT LOOK INTO LIGHT

UV LED RADIATION CAN CAUSE HARM TO YOUR EYES. DO NOT SHINE THE LIGHT IN YOUR EYES DIRECTLY OR THROUGH REFLECTIVE SURFACES. 365NM THROUGH 390NM LED CAN BE CONSIDERED CLASS 1M LED PRODUCT. PROTECTIVE GOGGLES ARE INEXPENSIVE AND READILY AVAILABLE. DO NOT LET CHILDREN USE THESE LIGHTS.
