

New Product – Key Facts

Product:
Aviation Snips 101, 102 & 103

Application:

The main application for IRWIN Snips are the cutting of thin material like sheet metal, sheet copper, sheet aluminium etc.

101 – Red grips for straight cuts / tight curves to the left

Lower serrated blade

- Lower serrated blade grips material for a smoother cut with double marked edges.

Cold-formed blades

- Cold-formed blades are 44% stronger than hot forged blades and requires 25% less cutting force because of more accurate blade tolerances.

Long life spring

- Long life spring for increased durability and reliability.

Compound leverage

- Compound leverage means reduced pressure and faster and easier cutting.

Extra strong splines

- 2,66 mm alloy steel splines provide increased rigidity and less flexing.

Safety latch

- Easy push-up safety latch allows one-handed operation.

Soft grips

- Over-molded Pro-touch soft grips provide superior comfort. Resists twisting and will not come off.
