

Description :

General adhesive uses in Plastic , Ornament and Toy with good operation and adhesion.

Physical properties and general information :

Raw base material	:	Thermoplastic synthetic resin	
Color	:	Water-white	Sight
Form	:	Glue stick	Sight
Softening point	:	88±6°C	Ring & Ball Method
Viscosity @ 180°C	:	18500mPas	Brookfield Viscometer
@ 160°C	:	35000mPas	LVDV II+
Application temp.	:	Use with hot melt glue gun	
Open time	:	26~28 sec	
Setting time	:	13~16 sec	
Solid content	:	100%	
Storage direction	:	Store in cool, dry place	

Safety Instructions :

To minimize the risk of burns, we recommended the use of eye protection and protective clothing when working near a hot melt applicator.
