

CASIO

NEW 2026 CLASSWIZ

12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION

The UK's favourite scientific calculator

Designed with
sustainability in mind.

- **The existing range already has its own ECO credentials with its durability/long life cycle, current eco packaging and solar power options.**

New Jan 2026

- Launch of sustainability-oriented models from Jan-26
- Casio will launch an eco range initially within the fx-85 ClassWiz models
- Eco range will be constructed from recycled plastics and, dependent on colour of model will contain between 45% and 90% recycled materials
- 4 colour **FX-85 models** will be offered in the **eco range**

ECO forms part of NEW ClassWiz+ model range

- Solar power

- Entry level Scientific **with upgraded menu operations**

- fx-991CW+ UK

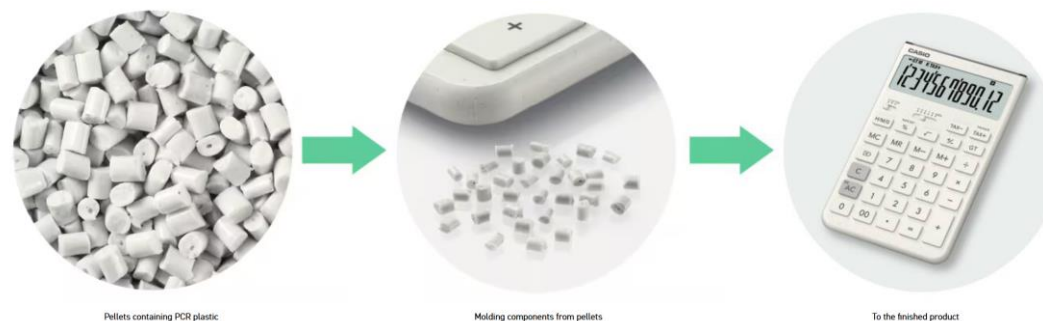

- **UK specific** 991CW model, inc UK curriculum functions

- Solar Power

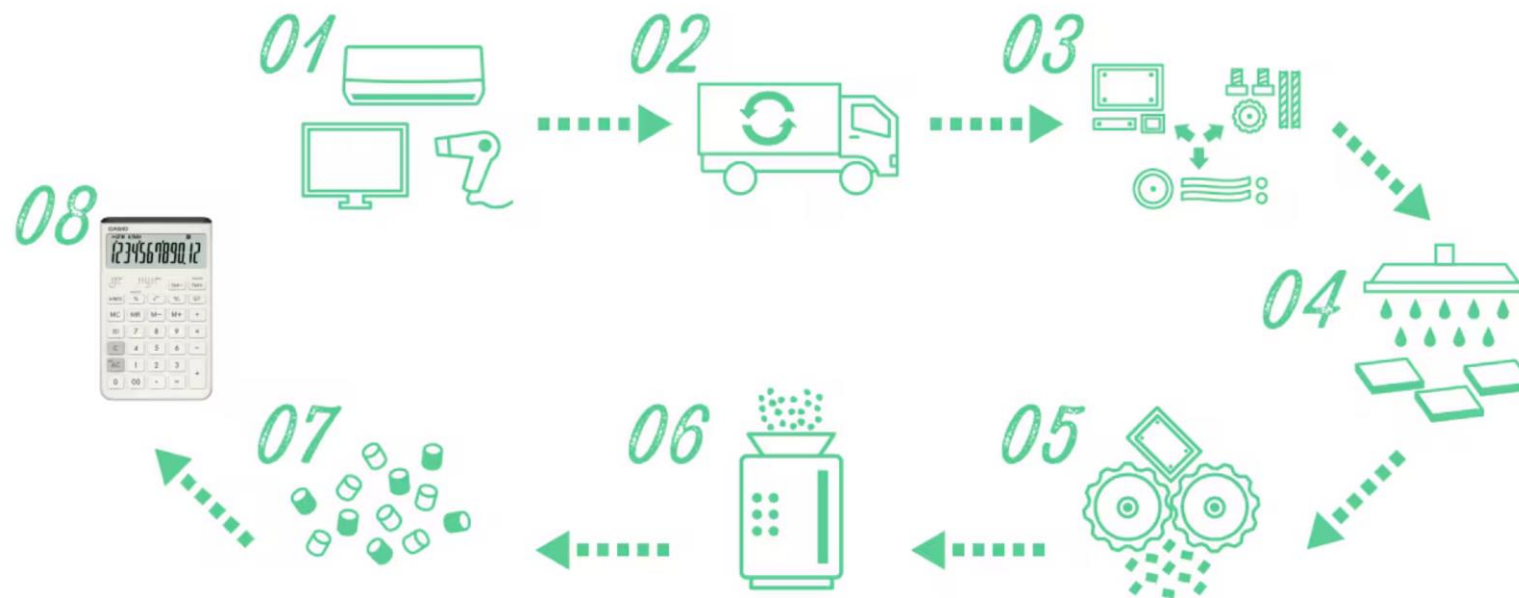

Use of Post-Consumer Recycled (PCR) materials

PCR plastic is recycled plastic made from plastic products that consumers have used and disposed of. Using PCR plastic helps reduce waste and virgin plastic usage, thereby reducing the environmental impact of plastic use.

Recycling Flow

New products are created using material that has been sorted → cleaned → crushed → property-enhanced → pelletized from used consumer products (home appliances, electronic devices, etc.) collected from the market.

1. Consumption → 2. Collection → 3. Sorting → 4. Cleaning → 5. Crushing → 6. Property Enhancement → 7. Pelletization → 8. Product Manufacturing

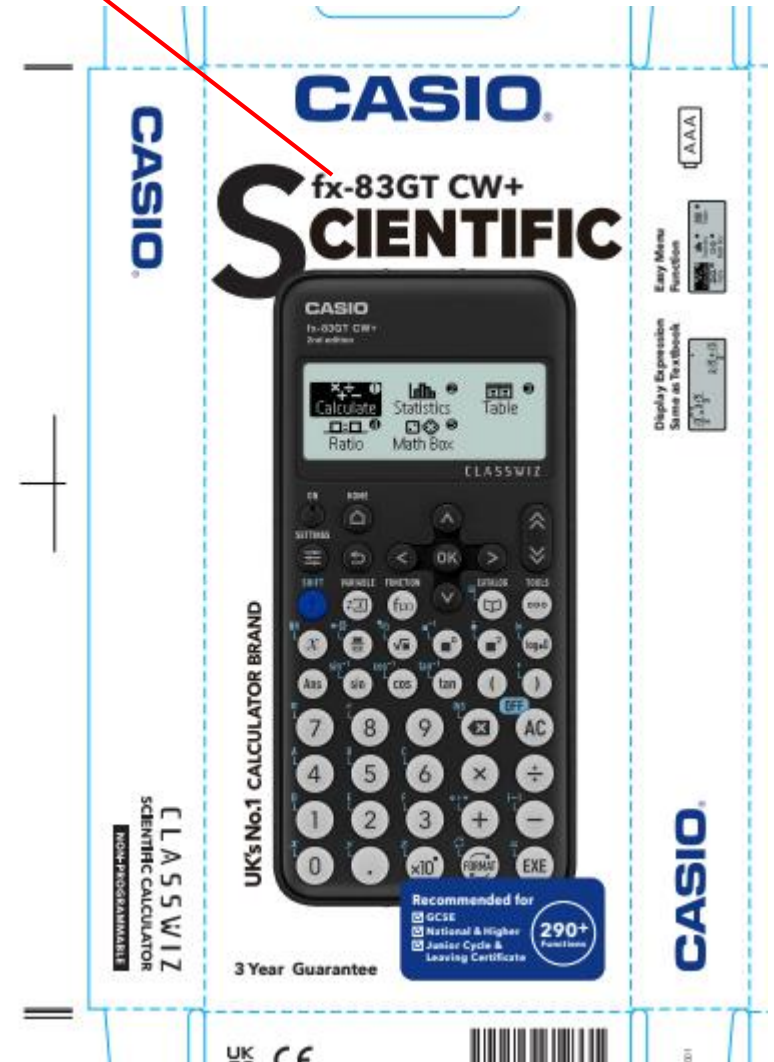

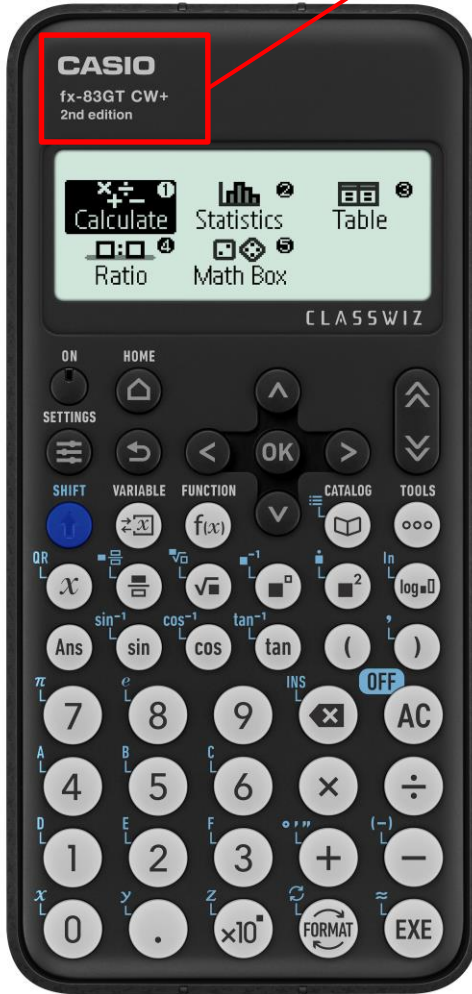

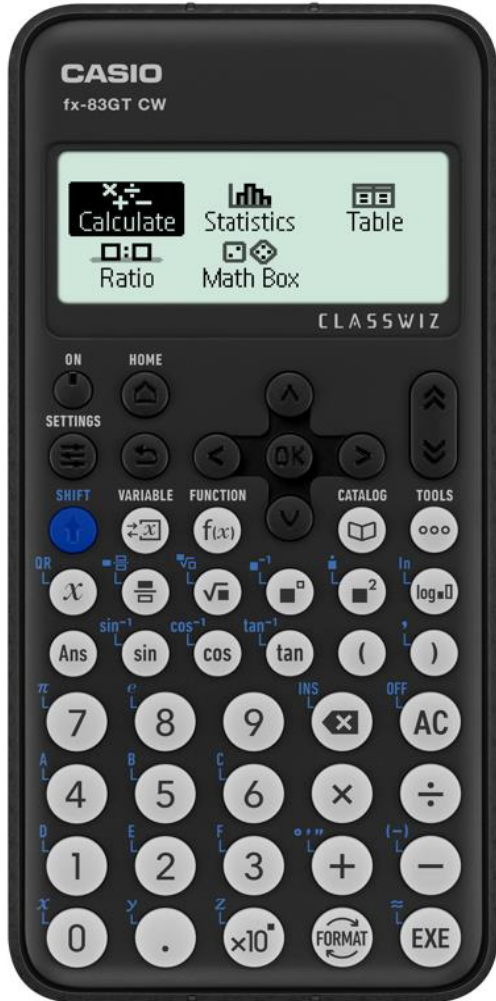

Uses recycled plastic

Post-Consumer Recycled (PCR) Materials

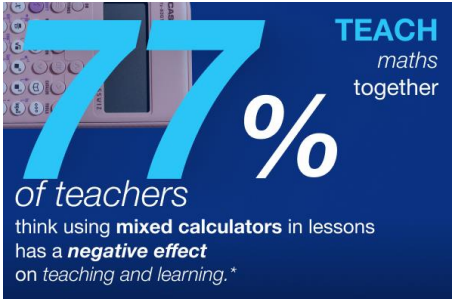

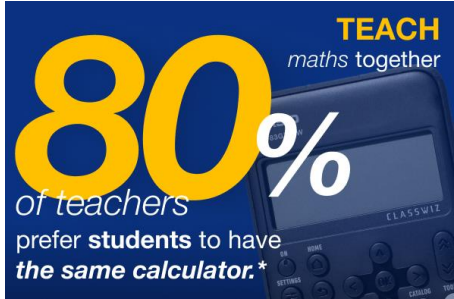

CASIO is advancing the use of PCR plastic (Post-Consumer Recycled plastic) in calculator main bodies.

“CW+” and “2nd Edition” to indicate latest model

- Casio provides Free Software designed to help teachers in classroom
- Training webinars delivered by Casio to UK teachers designed to train on software and support Casio Calculators

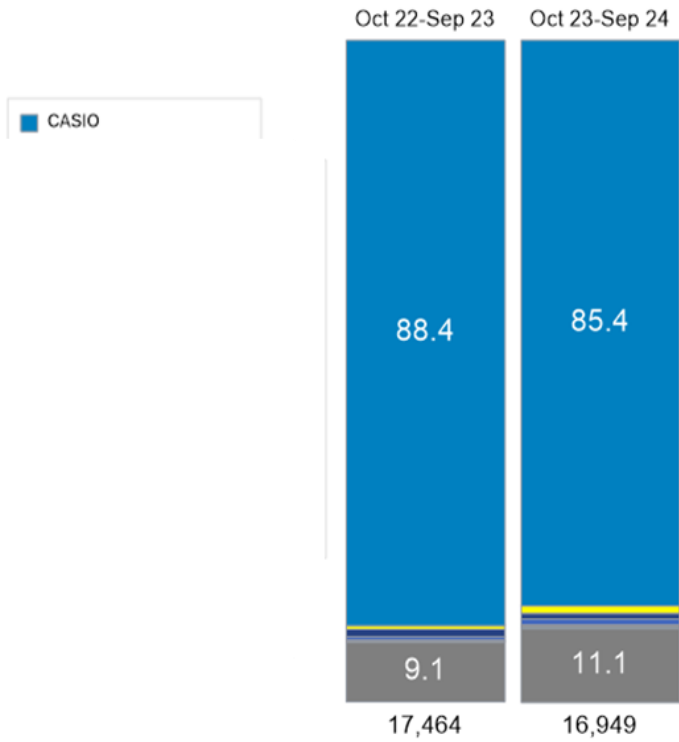

“All of the things I need as a Maths Teacher are there at the click of a single button with ClassPad. It is the perfect tool alongside the Casio Calculator”.

Our math’s department would recommend the use of the Casio fx-83GT-CW which has clear displays and is student-friendly. This is an upgraded model compared to previous

Scientific Calculators: UK Market Sell out

Casio share of Scientific Calculators reduced from 88% during FY24 and as a result of GTX>GTCW model transition. We expect share to recover to previous levels now that GTCW fully adopted by Education

In the past year 85% of the value of Scientific calculators sold were Casio models (FX-83 / 85 / 991).

Not all schools recommend the FX-83 model, many schools only recommend the FX-85 and fx-991CW.

As a result most resellers range both the FX-83 and the FX-85.

Majority of A-Level maths students are recommended to use the FX-991
